## General Legal Disclaimer

Various statements in this document may constitute statements relating to intentions, opinion, expectations, present and future operations, possible future events and future financial prospects. Such statements are not statements of fact, and are generally classified as forward looking statements that involve unknown risks, expectations, uncertainties, variables, changes and other important factors that could cause those future matters to differ from the way or manner in which they are expressly or impliedly portrayed in this document. Some of the more important of these risks, expectations, uncertainties, variables, changes and other factors are pricing and production levels from the properties in which the Company has interests, or will acquire interests, and the extent of the recoverable reserves at those properties. In addition, exploration for oil and gas is expensive, speculative and subject to a wide range of risks. Individual investors should consider these matters in light of their personal circumstances (including financial and taxation affairs) and seek professional advice from their accountant, lawyer or other professional adviser as to the suitability for them of an investment in the Company.

Except as required by applicable law or the ASX Listing Rules, the Company does not make any representation or warranty, express or implied, as to the fairness, accuracy, completeness, correctness, likelihood of achievement or reasonableness of the information contained in this document, and disclaims any obligation or undertaking to publicly update any forward-looking statement or future financial prospects resulting from future events or new information. To the maximum extent permitted by law, none of the Company or its agents, directors, officers, employees, advisors and consultants, nor any other person, accepts any liability, including, without limitation, any liability arising out of fault or negligence for any loss arising from the use of the information contained in this document.

Reference to "CUE" or "the Company" may be references to Cue Energy Resources Limited or its applicable subsidiaries.

# Chairman's overview

I am pleased to present the Cue Energy Resources Limited Annual Shareholder Report for 2025, another successful year of financial performance, operational delivery, and value returned to shareholders.

Dear Shareholders,

Another strong performance from Cue, with revenue for the year of \$55 million, an increase of 10% on the previous year. This is despite volatility in the Brent oil price, which began FY2025 at US\$86/bbl and closed the year under US\$70/

bbl, a level that has continued into FY2026. These price movements impacted oil revenue from both our Mahato and Maari operations but were offset by strong production performance and contract gas sales.

In Australia, gas markets remain tight, with consistent commentary from the ACCC and the Australian Energy Market Operator forecasting shortages and potential LNG imports into Eastern Australia. Cue remains confident in demand fundamentals for our gas-producing assets in the Northern Territory. We drilled two successful development wells at the Mereenie field during the year to increase production, and we continue to assess further opportunities to unlock value from these assets. During the year, Cue was a major gas supplier to the Northern Territory, helping fuel the Territory's power stations that complement renewable energy sources.

In Indonesia, the Mahato PSC continued its strong performance with 11 new wells entering production during FY2025 and further drilling underway in early FY2026. This work has materially contributed to maintaining high production levels.

In New Zealand, the Maari field was granted a 10-year extension of its Petroleum Mining Permit, now valid to 2037 and we welcomed further regulatory clarity and policy from the government.

During FY2025, we returned \$14 million in dividends (2 cents per share) and announced a final dividend of 0.5 cents per share (\$3.5 million) for FY2025. Since the beginning of calendar year 2024, we've returned a total of \$31.5 million in dividends, a strong testament to the underlying strength of our production portfolio and capital management approach.

The final dividend was reduced compared to the previous period to balance shareholder returns with growth options as we progress towards a Final Investment Decision on the Paus Biru development, where Cue has the opportunity to increase our participating interest in the project by 10%. Cue enters FY2026 in a sound position, with a strong production base and clear pathways towards growth.

## Looking ahead:

The Paus Biru FID process is progressing, with final administrative steps underway. If approved, Cue will benefit not only from increased production in 2027, but also from a potential increased interest in the project.

At Mahato, continued well drilling is expected, with plans underway to begin development of the Telisa reservoir later in FY2026. In our 2025 Reserves and Resources Statement, we identified an additional 0.8 million barrels of contingent resources in the Telisa, which may be converted to 2P reserves over the coming year. We also expect to undertake further exploration activities in the Mahato PSC in early CY2026.

With the Maari permit tenure extended to 2037, optimisation efforts will continue, supported by a stable production base. August production averaged 5,600 barrels of oil per day, the highest monthly rate in over five years, highlighting the impact of recent work. We continue to assess options to expand production further and are awaiting final clarity on New Zealand's financial assurance requirements, which may impact cashflow allocations from the Maari project.

I want to acknowledge our team's continued dedication, our partners' collaboration and our shareholders' ongoing support. With a strong production base, a clear path to growth, and a prudent approach to investment, Cue is well-positioned to navigate the evolving energy landscape and deliver sustainable long-term value. We remain focused on maintaining financial strength, progressing high-quality opportunities, and adapting to the challenges and opportunities of the energy transition.

**Alastair McGregor**  
Chairman

# Financial and operations review

Cue navigated through a year of global uncertainties and market volatility to deliver another strong financial performance in FY2025, generating revenue of \$54.8 million from oil and gas production across its assets in Australia, Indonesia, and New Zealand, a 10% increase compared to the previous year.

This result reflects the continued strength of Cue's diversified portfolio, underpinned by stable production and improved pricing across key assets.

Revenue from Cue's onshore Australian assets increased by 11% to \$12.5 million, supported by the start-up of two new Mereenie wells and higher contract gas prices. The Maari asset in New Zealand recorded a 23% increase in revenue to \$12.4 million, due to four crude liftings during the year compared to three in the previous year. Revenue from the Mahato PSC increased by 19%, driven by a 30% increase in sales volumes and a high level of cost recovery associated with field operations and new development drilling.

Annual production totalled 602 thousand barrels of oil equivalent (mboe), which was broadly consistent with the previous year. In Indonesia, production from the Mahato PSC increased by 9%, reflecting the contribution of new development wells drilled during the year. At Maari, production remained stable overall, although some wells, including MN1 and MR4, were offline during the year due to workovers and repairs. In Australia, production from the onshore fields was steady, with two new Mereenie wells contributing strongly and offsetting natural field decline and customer nomination variability.

Production costs increased to \$29 million, up from \$20 million in FY2024. Approximately half of this was associated with increased operating cost at Mahato and Mereenie, reflecting the greater number of producing wells and associated field activities. The remainder includes production cost increases associated with timing of Maari inventory sales.

Net cash generated from operations was \$24 million, a strong result that reflects the quality of the Company's production base and the benefit of portfolio diversification. The cash balance at the end of the year was \$10.8 million with no debt. Following a Maari crude lifting receipt in early July, cash at 31 July 2025 increased to \$12.6 million.

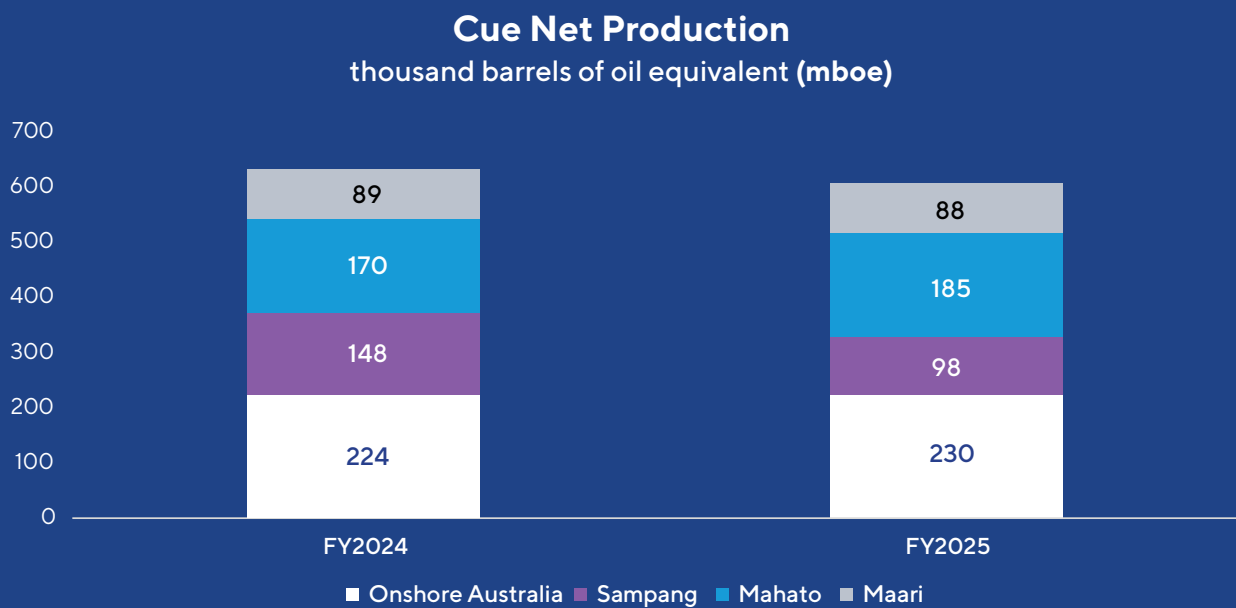

Cue has demonstrated commitment to provide returns to shareholders, with a total of \$14 million in dividends paid to shareholders during the year. The Cue Board has approved a final dividend for FY2025 of 0.5 cents per share, returning an additional \$3.5 million to shareholders.

The company continues to benefit from strong asset-level performance and financial discipline. Its producing portfolio has delivered another year of solid revenue, cashflow, and shareholder returns, providing a strong foundation for continued growth and development in FY2026.

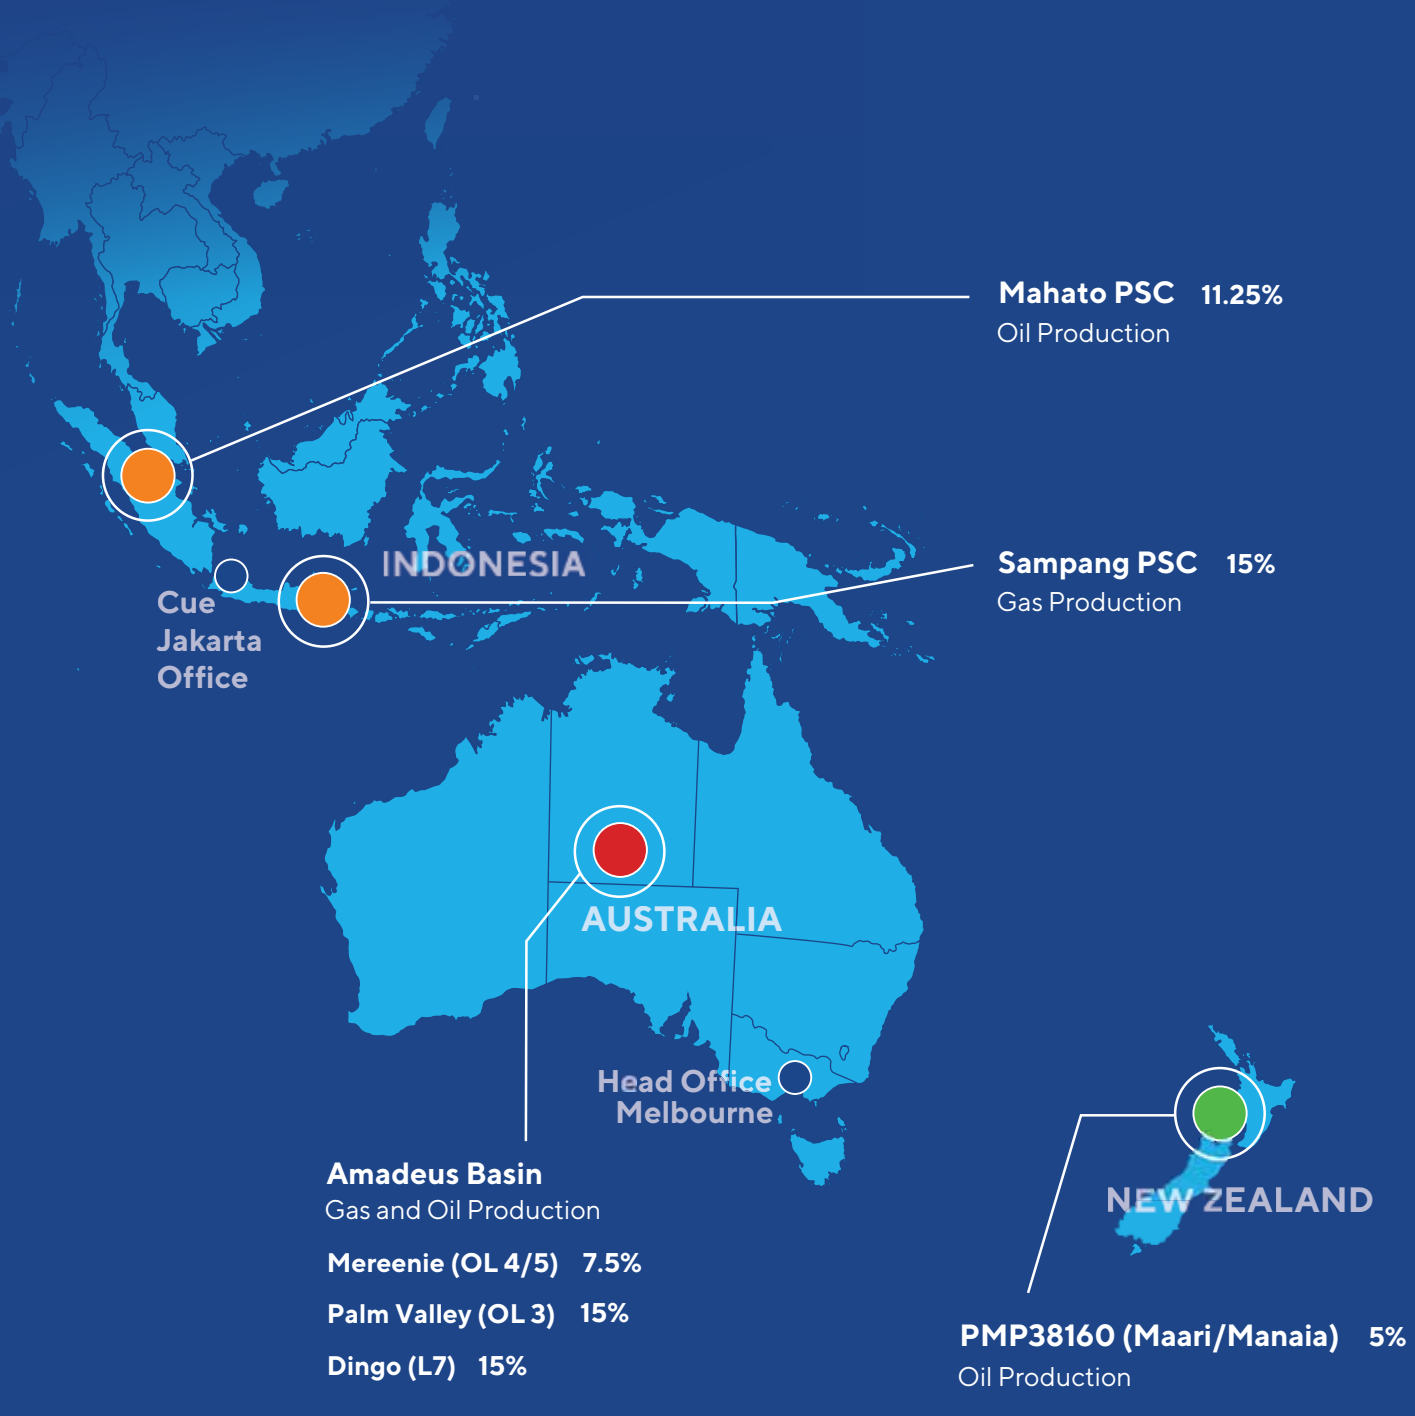

## \$24 Million Cash Generated from Operations shows the Quality of Cue's Production Base

602 mboe production was consistent with the previous year

## Australia

### MEREENIE, PALM VALLEY AND DINGO FIELDS

CUE INTERESTS	
<b>Mereenie</b> [OL4 & OL5]	7.5%
<b>Palm Valley</b> [OL3]	15%
<b>Dingo</b> [L7]	15%
<b>Operator</b>	Central Petroleum Limited

The Mereenie, Palm Valley, and Dingo fields generated \$12.5 million in revenue for Cue during the year, representing an 11% increase on the previous year.

This uplift was driven by a 15% increase in Mereenie gas production, with the WM29 and WM30 development wells drilled during the second and third quarters, continuing to exceed pre-drill expectations. Higher contracted gas prices during the year also contributed to the improved revenue.

In the first half of the year, Cue announced the execution of six-year gas sales agreements with the Northern Territory Government, effective from 1 January 2025. These contracts provide firm gas delivery from 2025 to 2030, with additional flexibility for gas sales from the WM29 and WM30 wells and during NGP outages. In the final quarter of the year, a conditional gas supply agreement with Arafura Rare Earths for the Nolans Project lapsed, as the condition precedent of Arafura's Final Investment Decision, was not met.

The WM29 and WM30 development wells were successfully drilled and brought online during the second and third quarters. Both wells exceeded production expectations and contributed an estimated 9 terajoules (TJ) per day of additional gas production from Mereenie.

The Northern Gas Pipeline (NGP) remained closed for most of the year due to reduced production from the offshore Blacktip field. During this time, gas sales from the Mereenie and Palm Valley fields were directed to Northern Territory gas sale agreements, which mitigated the impact of the pipeline outage.

Oil sales from the Mereenie field were partially constrained by offtake arrangements in Q4 and July 2025 which reduced gas capacity by approximately 5%. Gas volumes are not currently being impacted.

Planning progressed during the year for the drilling of two development wells in the Palm Valley field. In the final quarter, the Environmental Management Plan for these wells was approved by the Northern Territory Government. Any future well drilling decisions remain subject to joint venture approval.

## Indonesia

### MAHATO PSC

CUE INTERESTS	
<b>Cue</b>	11.25%
<b>Operator</b>	Texcal Energy Mahato Inc

The PB field in the Mahato PSC continued to be a strong contributor to Cue's performance, generating \$23.5 million in revenue during the year, a 19% increase over the previous period.

Production averaged 510 barrels of oil per day (bopd) net to Cue, with total field output exceeding 7,000 bopd by the end of the financial year.

Development activities progressed under the Operator's approved Field Development Optimisation Plan (OPL) Phase 2, which includes drilling fourteen new development wells, converting one existing production well to a water injection well, and establishing three new drilling locations and associated production infrastructure. Eleven wells were drilled and brought into production during the year, supported by the construction of new surface facilities. The final two wells under the OPL2 plan were completed at the start of FY2026, bringing the approved development program to completion with thirty four production wells operating in the PB field.

Current oil production is sourced from the Bekasap A,B and C reservoirs. The Operator is planning further development of the field, targeting production growth from the Telisa reservoir. This shallower, regionally extensive formation is already producing in other Central Sumatra Basin fields and was successfully tested in an existing well during the year. It is expected that production from the Telisa will be accessed through a combination of new wells and existing well recompletions.

The PC-1 exploration well was drilled during the second quarter to a total depth of 5,800 feet. The well did not return commercial hydrocarbons on testing and was subsequently plugged and abandoned. Exploration data acquisition and evaluation continued throughout the year, and further drilling is expected to be proposed by the Operator during FY2026.

## Indonesia

### SAMPANG PSC

CUE INTERESTS	
<b>Cue</b>	15%
<b>Operator</b>	Medco Energi

The Oyong and Wortel gas fields generated \$6.4 million in revenue for Cue during the year, underpinned by long-term, fixed-price contracts for gas sales to Indonesia Power’s Grati Combined Cycle Gas Power Plant.

The decrease in revenue from the prior year reflects lower production due to natural field decline and a temporary technical issue at the Wortel field, which followed a scheduled maintenance shutdown in May. This issue halted gas production from Wortel for the remainder of the financial year but has since been remediated, with production restored subsequent to year end.

Progress continued on the installation of a compressor at the onshore Grati gas processing plant. The compressor is designed to reduce wellhead pressure at the Oyong and Wortel fields, thereby improving production efficiency and enhancing overall gas recovery. Completion of this project is expected in the second quarter of FY2026.

Discussions advanced between the Operator, Medco Energi Sampang Pty Ltd (Medco), and the Indonesian Government regarding key commercial terms for the Paus Biru gas development. These include a proposed extension of the Sampang Production Sharing Contract (PSC), which is currently due to expire in December 2027, as well as economic incentives critical to the project’s viability. Medco has submitted a request to amend the PSC to support development of Paus Biru, with both the PSC extension and fiscal incentives considered essential for a Final Investment Decision (FID) to be reached.

During the year, Joint Venture partner Singapore Petroleum Sampang Ltd (SP Sampang) formally advised Medco and Cue that it will not continue as a participant in the PSC beyond the current term, including any participation the Paus Biru development. In accordance with the joint operating agreement, SP Sampang’s interest will be redistributed between Cue and Medco upon expiry. This redistribution may result in Cue increasing its participating interest in the PSC by up to 10%.

Cue and Medco remain committed to progressing both the Paus Biru development and the necessary PSC extension to enable the project’s future development.

The proposed development plan for Paus Biru includes drilling a single well, installing a wellhead platform, and constructing a 27-kilometre subsea pipeline to connect the field to existing Oyong infrastructure. Subject to final approvals, gas production is expected to commence in 2027 at a rate of 20–25 mmcf/d.

## New Zealand

### PMP 38160 (Maari/Manaia)

CUE INTERESTS	
<b>Cue</b>	5%
<b>Operator</b>	OMV

Cue’s revenue from the Maari and Manaia fields increased by 23% over the previous year to \$12.4 million, primarily due to the sale of an additional cargo during FY2025.

Annual production was broadly in line with FY2024 averaging 4,800 barrels of oil per day (bopd) (100%) although production during the fourth quarter was impacted by downhole Electric Submersible Pump (ESP) faults in the MN1 and MR4 wells. These outages resulted in the temporary loss of approximately 1,500 bopd. Both wells were repaired following the end of the financial year and subsequently resumed production at their pre-workover rates.

The MR6a production well, which has been offline for a number of years, was successfully recompleted during the year and returned to production from the third quarter. High uptime and continued optimisation of well performance, including through water injection and targeted well management, supported strong production throughout the year. Prior to the ESP-related outages, daily oil production from the Maari/Manaia fields was consistently maintained above 5,500 barrels of oil per day (100%).

During the year, the Maari field reached a significant milestone, with cumulative production surpassing 50 million barrels of oil since production commenced in 2009.

The Maari permit was recently granted a 10-year extension to 2037 by the New Zealand Government.

# Reserves and Resources

As at 30 June 2025, Cue's 2P reserves of 5.5 mmboe have stayed consistent with the previous reporting period less actual production. An increase in 2P reserves was reported from Maari, due the better than expected production performance from the field. Sampang PSC 2P reserves were reduced as the Oyong and Wortel fields experienced faster than expected late life production decline . Meerenie and Dingo reserves both

A reduction in Mahato PB field 2P oil reserves from the producing Bekasap reservoir, was offset by the addition of 1.1 mmboe of Contingent (2C) Resource in the Telisa reservoir. The Telisa reservoir is expected to be the target of production growth in FY2026 and beyond and once commercialised, some or all of this Contingent Resource may be re-classified as reserves.

Paus Biru gas resource remains as Contingent until a positive Final Investment Decision (FID) is made by Cue.

### Compliance Statements

Oil and gas reserves, are reported as at 1 July 2025 and follow the SPE PRMS Guidelines (2018).

This resources statement is approved by, based on, and fairly represents information and supporting documentation prepared by Echelon General Manager Assets & Engineering Daniel Leeman. Daniel is a Chartered Engineer with Engineering New Zealand and holds Masters' degrees in Petroleum and Mechanical Engineering as well as a Diploma in Business Management and has over 15 years of experience. Daniel is also an active professional member of the Society of Petroleum Engineers. Echelon reviews reserves holdings twice a year by reviewing data supplied from the field operator and comparing assessments with this and other information supplied at scheduled Operating and Technical Committee Meetings.

Daniel is currently an employee of Echelon Resources Limited whom, at the time of this report, are a related party to Cue Energy. Daniel has been retained under a services contract by Cue Energy Resources Ltd (Cue) to prepare an independent report on the current status of the entity's reserves. As of the 1 July 2025, Echelon held an equity of 49.97% of Cue.

Cue currently holds an equity position of 5%, 11.25% and 15% in the Maari, Mahato and Sampang assets respectively, though Production Sharing Contract adjustments at the Mahato and Sampang fields affect the net equity differently across the various reserve categories.

In the Amadeus basin, Cue currently holds 7.5% equity in the Mereenie field and 15% equity in each of the Dingo and Palm Valley fields.

For undeveloped reserves, the following project maturity sub-classes are assumed- at Mahato PSC, Undeveloped-Approved for Development, at Sampang PSC- Justified for Development, at Maari- Justified for Development, at Mereenie and Dingo- Justified for Development.

For Sampang & Mahato PSC Contingent Resources, as the developments are not yet sanctioned, the economics and royalties are not yet known, therefore an assumed net effective equity is used of 15% for Paus Biru, 8.18% for Jeruk and 11.25% for Telisa (Mahato PSC).

The Contingent Resource sub-classes are as follows- for Paus Biru, 2C Development Pending, for Jeruk and Telisa, 2C Development Unclassified, and for Mereenie and Palm Valley 2C Development On Hold.

Estimates are based on all available production data, the results of well intervention campaigns, seismic data, analytical and numerical analysis methods, sets of deterministic reservoir simulation models provided by the field operators (OMV, Texcal, Medco and Central Petroleum), and analytical and numerical analyses. Forecasts are based on deterministic methods.

For the conversion to equivalent units, standard industry factors have been used of 6Bcf to 1mmboe, 1Bcf to 1.05PJ, 1 tonne of LPG to 8.15 boe and 1TJ of gas to 163.4 boe.

Net reserves are net of equity portion, royalties, taxes and fuel and flare (as applicable).

All reserves and resources reported refer to hydrocarbon volumes post-processing and immediately prior to point of sale. The volumes refer to standard conditions, defined as 14.7psia and 60°F.

The extraction methods are as follows; for Maari oil is produced to the FPSO Raroa and directly exported to international oil markets, at Mahato, it is via EPF facilities which includes an oil and water separation system, with the oil then piped 6km to the Petapahan Gathering Station, at Sampang, gas is gathered from the Wortel and Oyong fields and piped to shore where it is sold into the Grati power station, at the Mereenie and Palm Valley gas fields gas is gathered from the wells and ultimately collated into the Amadeus Gas Pipeline where sales vary to different customers within the region and further afield and at Dingo, gas is sold into Alice Springs and the Owen Springs power plant.

Tables combining reserves have been done arithmetically and some differences may be present due to rounding.

For the 2P change of reserves year-on-year, quoted as the reserves replacement ratio herein, the calculation is performed via; stated 2P total reserves as at 1 July 2025, divided by the sum of stated 2P total reserves as at 1 July 2024, less production during FY25 and any acquisitions, all in millions of barrels of oil equivalent. In this case  $RRR = 5.5 / (6.3 - 0.6 - 0.0) = 96\%$ .

# Sustainability report

## Our Commitment

At Cue, we remain committed to upholding high standards in health, safety, and environmental stewardship, recognising these as fundamental to our long-term business success. Our operations continue to be guided by a Board-approved Health, Safety and Environment (HSE) Policy, supported by a robust HSE Management system. The Operational Risk and Sustainability (ORS) Committee, comprising members of our Board of Directors, meets regularly to oversee and evaluate the company’s HSE initiatives and operational risk management.

Throughout 2025, Cue recorded zero lost time injuries and no significant spills across our operations. In our non-operated joint ventures, we continue to actively support and promote high standards of health and safety. As part of our governance practices, we review incident and safety reports, providing constructive feedback to help ensure safe, efficient and responsible operations across our asset base.

## Working together with our Communities

Cue is dedicated to building strong relationships with the communities in which we operate. Through our joint venture partnerships, we contribute to local well-being by supporting economic participation, education, infrastructure, and health initiatives. We continue to prioritise local and regional economic development in line with our Capturing Local Economic Benefits Policy, and we encourage our joint venture partners to adopt the same approach.

In Indonesia, our Mahato PSC joint venture partner, Texcal Energy, led a range of community initiatives throughout the year in Riau province. These included the “Green Restoration of Our World” program, which saw the planting of 1,000 trees across seven regencies in the Province to commemorate Earth Day. During the Ramadan period, food supplies were distributed to families in need through the Safari Ramadan initiative in Tapung, with educational supplies donated to orphans in Tapung Village under the same program.

Medco Energi, our Sampang PSC joint venture operator, also remained deeply engaged with communities surrounding our operations in East Java. Among this year’s initiatives was the planting of 300 trees to promote environmental restoration and the construction of an access road to improve daily travel for fishermen in Pulau Mandangin Village. The joint venture also supported environmentally friendly fishing practices by partnering with the Sampang Fisheries Service to provide training for local fishermen in Camplong District.

Medco Energi launched a women’s microenterprise development program, supported local fishermen with the donation of fishing nets, and continued to fund youth empowerment programs, such as the salted duck egg production initiative in Camplong District. The year concluded with the planting of 180 trees in Trunojoyo Square in Sampang, reinforcing our commitment to local environmental care.

In Australia, Cue’s onshore assets in the Northern Territory are operated by Central Petroleum, which continues to maintain strong ties with Traditional Owners, local communities, and other stakeholders. Central Petroleum actively supports Indigenous employment and local business development, with a significant proportion of onsite personnel identifying as Indigenous. Land access agreements remain in place through the Central Land Council (CLC), with whom Central maintains regular engagement on behalf of the joint venture. Cue also provided direct support to the Akeyulerre Aboriginal Corporation, reaffirming our long-standing commitment to working in partnership with Traditional Owner organisations in the region.

In New Zealand, Cue’s Maari joint venture saw the successful delivery of two community projects under its three-year commitment with the South Taranaki District Council. The Aotea Park pump track officially opened in December 2024, creating an all-ages recreational facility designed to encourage physical activity and social connection. The second community initiative, a new jetty and surrounding area on the Patea River, has been recently completed and is expected to provide long-term benefits to the local community.

**Environment Stewardship**

Cue remains focused on working closely with our operators and joint venture partners to reduce the environmental impact of our operations. This year, we were pleased to see Medco Energi, operator of the Sampang PSC, awarded a Green PROPER 9 rating from Indonesia’s Ministry of Environment and Forestry. This highly regarded rating is reserved for companies that demonstrate best-practice environmental management and a strong commitment to sustainable operations.

Across all jurisdictions, we continue to support initiatives that reduce emissions, and improve environmental outcomes including energy optimisation, habitat restoration and emissions mitigation.

# Task Force on Climate-Related Financial Disclosure (TCFD) Statement

This section outlines Cue Energy Resources' approach to climate disclosure and climate risk management. It is structured in accordance with the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD).

## Statement from the Chief Executive

Oil and gas production continues to be the core of Cue's strategy. We undertake our activities in a sustainable manner, minimising emissions where practical while reliably providing energy to support community development.

In our areas of production, it is increasingly recognised that natural gas will play an important role in the low-carbon energy mix going forward. In Australia, the Federal Government's Future Gas Strategy confirms Australia's commitment to supporting global emissions reductions and highlights that gas production must be optimised to help achieve this objective. Indonesia's 2025-2030 Electricity Supply Business plan (RUPTL) includes 10.3GW of new gas-fired power capacity over the next five years, alongside planned increases in renewable energy generation.

Energy security and clean energy transition are key future themes of the IEA's *World Energy Outlook 2024*. As an energy producer supplying gas into domestic markets in Indonesia and Australia, we are proud to contribute to regional energy security and to provide fuel for firm power that complements intermittent renewable sources.

The Mereenie field has been a reliable supplier of gas in the Northern Territory. During parts of FY2025, Cue and its joint venture partners supplied more than 50% of the gas required to power the Northern Territory. The NT grid relies heavily on gas-fired power generation, which reduces the need for higher-emission alternatives such as diesel.

We monitor and report emissions from our own projects, and as a non-operating joint venture partner, we support our operators in reducing emissions at our project sites through new process, upgraded equipment, and optimisation of existing infrastructure.

This report outlines how we assess and manage the risks and opportunities of climate change on our business. The Australian Government is phasing in new mandatory climate-related financial disclosures, which will apply to Cue from July 2027. We will transition to meet these new requirements and, in the meantime, continue reporting against the TCFD recommendations to provide stakeholders with a transparent view of our approach to climate risk.

## Matthew Boyall

Chief Executive Officer

# Task Force on Climate-Related Financial Disclosure (TCFD) Statement continued

## Governance

### Climate-Related Risk Governance Process

Cue has a governance structure in place to support management of all risks, including climate-related risks. These risks are overseen by the Operational Risk and Sustainability Committee, which reports directly to the Board.

# Task Force on Climate-Related Financial Disclosure (TCFD) Statement continued

## Board oversight

The recognition and management of risks are outlined in the Company Charter, available in the Corporate Governance section of our website. The specific responsibilities are summarised below:

### Board

- Review all risks, including climate-related risks and opportunities, and ensures they are appropriately managed to support the Company's business strategy.
- Understands the material risks faced by the Company and ensures appropriate risk management strategies and control measures are in place and actively implemented.

### Operational Risk and Sustainability Committee (ORSC)

- Sets, reviews, and agrees on relevant risk policies, practices, frameworks, targets, and performance.
- Is assigned, under its Charter, the responsibility for approving environmental policy and monitoring progress, including responses to climate change.

### Chief Executive Officer (CEO)

- Accountable to the Board for the implementation of climate policies.
- Responsible for the day-to-day operational oversight of climate risk and opportunities, including the management of climate-related objectives and targets.

### Management and Staff

- Responsible for identifying, assessing, and managing risks as described in Cue's risk register.

## Strategy

### Actual and potential impacts of climate-related risks and opportunities

The Company produces oil and natural gas, supplying markets in Asia and the East Coast of Australia.

Natural gas from Cue's onshore Australian projects supports power generation and industrial use in the Northern Territory and the broader East Coast gas market. In Indonesia, all gas produced from the Sampang PSC is used for power generation, supporting economic growth in East Java by displacing electricity that might otherwise be generated using coal. Both internal and external forecasts support the continued demand for oil and gas, with ongoing economic value derived from production and reserves.

# Task Force on Climate-Related Financial Disclosure (TCFD) Statement continued

## Product demand

Cue draws on various external and internal analyses to assess the ongoing demand for its products.

Time Horizon	Demand
Short Term	<ul style="list-style-type: none"> <li>- In Australia, the Australian Energy Market Operator's (AEMO) 2025 <i>Gas Statement of Opportunities (GSOO)</i>, highlights rising risk of peak-day shortfalls and seasonal supply gaps in the southern states beginning in 2028, with annual supply gaps projected from 2029.</li> <li>- The ACCC also forecasts material gas shortfalls in the East Coast gas market, potentially emerging earlier, during the winter of 2026.</li> <li>- In Southeast Asia, the IEA's <i>Stated Policies Scenario (STEPS)</i> forecasts a 20% increase in oil demand by 2030 relative to 2023 levels. Even in the Announced Pledges Scenario, demand is expected to grow by 10% by 2030.</li> <li>- The Indonesian government has set domestic production targets of one million barrels of oil per day and 12 Bcf/d of gas by 2030 to support domestic energy needs and reduce import dependency.</li> <li>- Indonesia's state utility PLN forecasts the addition of 10 GW of gas-fired power generation capacity over the next five years, as outlined in its 2025 Electricity Supply Business Plan.</li> </ul>
Medium to Long Term	<ul style="list-style-type: none"> <li>- In the Northern Territory, Cue's key Australian gas market, AEMO has identified a potential supply gap of 5-10 PJ annually between 2028 and 2039. This shortfall is attributed to increased industrial demand and the region's continued reliance on gas-fired generation.</li> <li>- The Australian Government's <i>Future Gas Strategy</i> states that under all credible net-zero scenarios, natural gas will be needed through to 2050 and beyond, although its production and use are expected to evolve.</li> <li>- In Southeast Asia, long-term oil demand is forecast by the IEA to grow by 28% by 2035 and to continue increasing through to 2050.</li> </ul>

## Regulations

Cue operates across multiple jurisdictions, each with its own regulatory framework. The Company continually assesses risks related to climate change, carbon pricing, and the physical impacts of environmental change. Strategic planning and adaptation remain key to ensuring both compliance and operational resilience.

### New Zealand

New Zealand has a well-established Emissions Trading Scheme (ETS). Under this scheme, Cue is required to report annual greenhouse gas emissions and to purchase and surrender one New Zealand Unit (NZU) to the government for each tonne of carbon dioxide equivalent emissions. Cue incorporates modelled NZU prices in performance forecasts and sensitivity analyses for the Maari asset.

### Australia

At present, Cue is not subject to participation in, or reporting under, any mandatory carbon pricing scheme in Australia. However, mandatory climate-related financial disclosure requirements have been introduced by the Australian Government and are scheduled to apply to Cue from July 2027, based on the current implementation timeline. Emissions from Cue's onshore operations are reported annually by the field operator under the National Greenhouse and Energy Reporting (NGER) scheme. These emissions currently remain below the threshold required for coverage under the Safeguard Mechanism.

### Indonesia

Indonesia has implemented a sector-based carbon pricing regulation, though it does not currently apply to Cue's operations. Cue continues to monitor the evolving policy landscape in Indonesia, including the potential economic impacts of future climate-related regulations and environmental conditions. While these impacts remain uncertain at this stage, Cue remains alert to how they may influence asset value and operational performance over time.

# Task Force on Climate-Related Financial Disclosure (TCFD) Statement continued

## Alternative Energy Scenarios

The Company monitors various energy outlooks and industry forecasts that include scenario-based projections. Under most scenarios, natural gas continues to play a significant role in supporting future energy systems.

In both Australia and Indonesia, there is growing regulatory interest in capturing carbon emissions. If carbon capture and storage (CCS) becomes more cost-effective, Cue may consider emissions reduction through CCS; however, no current implementation plan exists.

Cue also monitors ongoing advancements in CCS technologies, hydrogen development, and renewable energy integration to support long-term decarbonisation at its projects.

While no investment or implementation decisions have been made to date, Cue remains engaged in exploring commercially and scientifically credible decarbonisation pathways.

## Risk Management

### Identify, Assess and Manage Climate Related Risks

The Company follows a robust Risk Management System Framework. Climate-related risks are evaluated alongside broader business risks and recorded in a central risk register, which assesses controls, assigns ownership, and monitors treatment plans. These risks are reviewed regularly, incorporating operational considerations, industry developments, peer benchmarks, shareholder feedback, regulatory updates, and internal analysis by staff and contractors.

Oversight of climate risk management is conducted through internal reviews by the Board's Operational Risk and Sustainability Committee. The Chief Executive is accountable for climate risks, including those associated with individual assets and financial investments impacted by climate change.

These risks have potential financial and operational implications, affecting overall profitability. However, climate-related financial, market, and socio-political risks also present opportunities, particularly in the increasing use of natural gas as a complement to renewable energy and as a lower-emission alternative to coal.

### Calculating Climate risk

In New Zealand, the Emissions Trading Scheme (ETS) sets a market-based carbon price. New Zealand Units (NZUs), representing one metric tonne of Carbon dioxide or its equivalent in other greenhouse gases, are purchased and surrendered by Cue for the Maari production asset. NZU prices and emissions forecasts are incorporated into sensitivity testing.

In Australia, Cue is not currently subject to a mandatory carbon pricing scheme. However, project and investment assessments factor in a range of potential carbon pricing outcomes. Likewise, in Indonesia, the prevailing carbon pricing regulations do not currently apply to Cue's operations. The Company monitors various emerging policies and regulatory frameworks that could impact asset value and operational performance.

Given the evolving nature of carbon pricing mechanisms and rapidly changing policy environments across the countries in which Cue operates, or is evaluating projects, carbon price modelling is based on the best available information and estimates at the time.

For physical climate risks across all asset interests, the Company maintains comprehensive insurance coverage and regularly participates in technical review meetings to assess engineering and infrastructure vulnerabilities.

### Risk Types and Controls

To categorise risk, the Company uses the following time horizon definitions:

- Short-term: 0-5 years
- Medium-term: 5-10 years
- Long-term: 10+ years

## Task Force on Climate-Related Financial Disclosure (TCFD) Statement continued

Risk Type	TCFD Category	Description	Time	Control/Strategic Response
Physical Risk – Acute	Strategy/Risk Management	More frequent extreme weather (e.g. cyclones, floods) disrupting exploration or logistics.	S-M	Integrate extreme weather into emergency planning; assess design resilience; JV operator influence.
Physical Risk – Chronic	Strategy/Risk Management	Long-term sea level rise or temperature shifts affecting asset value, insurance, or infrastructure.	L	Screen climate projections in long-term planning; evaluate adaptation options; influence JV planning.
Non-Physical – Policy & Legal	Strategy/Risk Management	Changes in carbon pricing (e.g. Safeguard Mechanism, Indonesia ETS) increasing JV operating costs.	M-L	Include carbon cost in financial models; monitor regulation; reflect in investment decisions.
Non-Physical – Technology	Strategy	Inability to access viable CCS or hydrogen solutions, delaying abatement options.	M-L	Watch technology readiness levels; review pilot projects; explore collaborative R&D via JVs.
Non-Physical – Market	Strategy	Long-term decline in gas demand due to electrification and renewables.	M-L	Maintain gas as a transition fuel narrative; explore new regional markets; track global scenarios.
Non-Physical – Reputation	Strategy/Risk Management	Stakeholder concern over GHG emissions intensity or lack of net-zero plan impacting license to operate.	M	Increase transparency; align with ISSB/TCFD; assess non-operator influence on JV emissions.
Non-Physical – Capital Access	Metrics & Targets	Difficulty securing funding without ESG disclosures or interim climate targets.	M	Strengthen climate reporting; consider setting intensity metrics; engage with financiers.
Non-Physical – Litigation	Risk Management	Exposure to legal challenges over emissions, biodiversity impacts, or climate disclosure gaps.	M-L	Ensure regulatory compliance; monitor litigation trends; maintain robust documentation.
Non-Physical – JV Misalignment	Governance/Strategy	Different risk appetites or priorities across JV partners on climate matters.	M-L	Raise expectations via JV governance; document preferred positions; seek influence through forums.
Opportunity – Energy Source	Strategy	Rising value of gas in transition scenarios as a firming fuel supporting renewables.	S-M	Promote gas' transition role in investor communications; position assets in low-carbon portfolios.
Opportunity – CCS/Hydrogen	Strategy	Potential to participate in future CCS hubs or hydrogen infrastructure development.	L	Track commercial feasibility; map local storage sites; assess JV partner readiness.
Opportunity – Renewable Integration	Strategy	Scope to integrate solar or hybrid systems into facility power to reduce Scope 1 emissions.	M	Assess off-grid renewables; collaborate with JV operators; build internal capability.
Opportunity – Nature-based Offsets	Strategy	Credible offset options (e.g. land restoration, reforestation) emerging in Australia and Indonesia.	M	Identify compliant schemes; evaluate cost per tonne; ensure additionality and permanence.
Opportunity – Stakeholder Positioning	Governance/Strategy	Early action or transparent disclosure may enhance brand and JV attractiveness.	S-M	Strengthen sustainability messaging; improve ESG ratings; engage key stakeholders proactively.

# Task Force on Climate-Related Financial Disclosure (TCFD) Statement continued

## Metrics and Targets

### Emissions

Cue reports on its proportion share of Scope 1 and Scope 2 emissions, based on emissions arising from production activities across its fields and office operations.

For **Scope 1**, detailed monthly emissions reports are submitted by the field operators at Maari, Sampang and Mahato. Central Petroleum, which manages Cue's onshore Australia assets, reports emissions through the National Greenhouse and Energy Reporting (NGER) scheme. Monthly emission estimates provided by Central Petroleum are also used in Cue's reporting.

### Scope 1 Emissions

Year	Emissions (tCO <sub>2</sub> e) *	Boe Produced	Intensity Factor (tCO <sub>2</sub> e per boe)
FY22	12,688	634,010	0.020
FY23	14,674	629,954	0.023
FY24	13,852	631,027	0.022
FY25	14,359	601,771	0.024

\* Prior years updated to include onshore Australia data. FY25 onshore Australia emissions are estimated. NGER reporting will be published by Cue when available later this year.

**Scope 2** emissions are reported from operations within the Sampang PSC, where grid electricity is used for certain processes at the Grati onshore gas plant. Additional Scope 2 emissions are reported from the Company's corporate offices in Melbourne and Jakarta, as well as from a field site in Indonesia.

### Scope 2 Emissions

Year	CUE Emissions (tCO <sub>2</sub> e) FY25	Previous Year
Total Office emissions (Melbourne & Jakarta)	6.5	7.0
Samarinda Warehouse	5.6	5.6
Sampang	260.3	250.8
Onshore Australia*	13.8	12.6
<b>Total Scope 2 Emissions</b>	<b>286.2</b>	<b>276.0</b>

\* Prior years updated to include onshore Australia data. FY25 onshore Australia emissions are estimated. NGER reporting will be published by Cue when available later this year.

## Task Force on Climate-Related Financial Disclosure (TCFD) Statement continued

The Company does not currently report on **Scope 3** emissions but does estimate and offset business travel emissions.

Cue offsets carbon emissions from office operations and air travel by partnering with Greenfleet Australia, a non-profit organisation that plants native trees in legally protected biodiverse forests. These forests help absorb carbon emissions and contribute to long-term environmental restoration.

### Offsets and Targets

#### Targets

Focus Area	Target	Status
Reporting	Continue to report Scope 1 and 2 emissions.	Ongoing. Mandatory reporting from Indonesia projects is being implemented
Reporting	Prepare for implementation of Australian mandatory climate disclosures.	Ongoing. Implementation scheduled for July 2027, based on Cue's size classification.
Policy and Legal	Review climate change policy and update if necessary.	Policy published annually and available on the Company's website.
Commercial	Apply an internal carbon price to investment decisions.	Applied on an as-needed basis.
Emission Reduction	Collaborate with JV partners to identify and implement emission reductions or offsets at producing sites.	Ongoing. All JV projects are currently assessing opportunities for emissions reductions.
Emission Reduction	Offset 100% of head office and corporate travel emissions.	FY2025 offset achieved via GreenFleet forest restoration.
Emission Reduction	Support sustainability improvements at office sites.	Ongoing.

**Cue Energy Resources Limited**  
**Directors' report**  
**30 June 2025**

The directors present their report, together with the financial statements, on the consolidated entity (referred to hereafter as the 'Consolidated Entity') consisting of Cue Energy Resources Limited (referred to hereafter as the 'company' or 'parent entity') and the entities it controlled at the end of, or during, the year ended 30 June 2025.

**Directors**

The names of Directors of the Company in office during the year and up to the date of this report were:

Alastair McGregor  
 Andrew Jefferies  
 Peter Hood AO  
 Richard Malcolm  
 Rod Ritchie  
 Samuel Kellner  
 Marco Argentieri

**Chief Executive Officer**

Matthew Boyall

**Company Secretary**

Anita Addorisio

**Principal activities**

The principal activities of the Group are oil and gas exploration, development and production.

**Corporate governance statement**

Details of the Company's corporate governance practices are included in the Corporate Governance Statement set out on the Company's website at: <https://www.cuenrg.com.au/site/About-Us/corporate-directory>.

**Dividends**

On 22 August 2025, the Company's Board of Directors approved the declaration of a final dividend of \$0.005 (0.5 cent) per fully paid ordinary share, totalling approximately \$3.5 million. This final dividend has been declared as a Conduit Foreign Income (CFI), unfranked dividend and will be paid on 25 September 2025.

On 25 February 2025, the Company's Board of Directors approved the declaration of a final dividend of \$0.01 (1 cent) per fully paid ordinary share, totalling approximately \$7 million. This interim dividend was declared as a Conduit Foreign Income (CFI), unfranked dividend and was paid on 26 March 2025.

**Financial performance**

The Consolidated Entity reported a net profit after tax of \$6.32 million for the year ended 30 June 2025 (FY 2025), compared to a net profit after tax of \$14.19 million for the year ended 30 June 2024 (FY 2024). The lower profit was driven by higher production costs at Mahato and Mereenie, higher amortisation, timing of Maari inventory sales, and a higher income tax expense.

<b>Financial performance</b>	<b>Production revenue FY 2025 \$'000</b>	<b>Production revenue FY 2024 \$'000</b>	<b>Gross margin FY 2025 %</b>	<b>Gross margin FY 2024 %</b>
Mahato	23,554	19,721	53%	74%
Onshore Australia	12,491	11,284	50%	47%
Maari	12,403	10,123	35%	55%
Sampang	6,393	8,531	36%	48%
	<u>54,841</u>	<u>49,659</u>		

**Cue Energy Resources Limited**  
**Directors' report**  
**30 June 2025**

EBITDAX

	FY 2025 \$'000	FY 2024 \$'000
Profit before tax	19,658	25,322
Depreciation and amortisation	8,936	6,400
Finance costs	494	684
EBITDA*	<u>29,088</u>	<u>32,406</u>
Business development expenses	16	66
Share based payments	140	112
Exploration activities	<u>1,066</u>	<u>228</u>
EBITDAX**	<u><u>30,310</u></u>	<u><u>32,812</u></u>

\* EBITDA is a financial measure which is not prescribed by Australian Accounting Standards ('AAS') and represents the profit under AAS adjusted for depreciation, amortisation, finance costs and tax.

\*\*EBITDAX is EBITDA adjusted to exclude business development costs, exploration and evaluation expenses, share based payments and one-off expenses. EBITDAX is used as a measure of financial performance as it is a commonly used indicator of performance of the Consolidated Entity's peers and therefore facilitates relative comparison of performance.

*Financial position*

The net assets of the Consolidated Entity decreased to \$58.05 million in FY2025 (FY 2024: \$64.91 million). Working capital, being current assets less current liabilities, was \$14.33 million (FY 2024: \$20.51 million).

The consolidated cash and cash equivalents decreased in FY 2025 by \$5.43 million to \$10.83 million (FY 2024: \$16.26 million).

	FY 2025 \$'000	FY 2024 \$'000
Net cashflows from operating activities	23,834	26,943
Net cashflows used in investing activities	(15,396)	(7,735)
Net cashflows used in financing activities	<u>(14,052)</u>	<u>(18,051)</u>
Net cashflows for the year ended 30 June	<u><u>(5,614)</u></u>	<u><u>1,157</u></u>

Net cash outflow increased due to lower receipts from operating activities, further driven downwards by higher investing cash outflow from increased costs and drilling of new wells.

**Business Risks**

The Consolidated Entity is subject to risks that are specific to the Consolidated Entity and its business activities, as well as general risks.

*Exposure to oil and gas prices*

The Consolidated Entity is exposed to global commodity price variability for oil products produced in Indonesia, New Zealand and Australia which are sold on a US dollar Brent crude benchmark price basis.

The majority of the Consolidated Entity's gas production is sold on fixed price contracts and is exposed to changes in the gas price on renewal or signing of new contracts. Gas sold in Australia on the short-term market is exposed to daily variations in price. In addition to normal market operations, gas prices for Australian sales are subject to risk of government intervention, including under the Competition and Consumer Amendment (Gas Market) Bill 2022.

Oil and Gas prices can be volatile. A decline in the price of oil and gas may have a material adverse effect on Consolidated Entity's financial performance.

The valuation of oil and gas assets is affected by expectations of future oil and gas prices. An extended or substantial decline in oil and/or gas prices or demand, or an expectation of such a decline, may reduce the expected cash flows and/or quantity of reserves and resources classified in relation to the associated oil and gas assets, which may lead to a reduction in the valuation of these assets.

*Foreign exchange risk*

The Consolidated Entity is exposed to foreign currency risk on cash and cash equivalents, oil sales, the recoverable value of oil and gas assets and capital commitments that are denominated in foreign currencies.

The Consolidated Entity's financial report is presented in Australian Dollars (AUD) and the functional currency for its operations in New Zealand and Indonesia is the United States Dollar (USD). The majority of the Consolidated Entity's costs are incurred in currencies other than AUD and revenue is mainly received in USD. Accordingly, it is subject to fluctuations in the rates of currency exchange between these currencies, the primary impact of which is reflected in other comprehensive income.

The Consolidated Entity currently does not utilise hedging or other derivative instruments. Foreign exchange risk exposures are mitigated through natural hedging of cost and revenue currencies, where appropriate.

*Ability to access funding*

Exploration, development, and production can involve significant capital expenditure. If cashflows decrease or the Consolidated Entity is not able to access necessary funding, this may result in postponement or reduction of capital expenditures, relinquishment of rights in assets or otherwise may have an adverse effect on the Consolidated Entity's operations and financial performance.

The Consolidated Entity's ability to raise additional funds if required would be subject to, among other things, factors beyond the control of the Consolidated Entity and its Directors, including cyclical factors affecting the economy, investment climate for the energy sector and share markets generally. If for any reason the Consolidated Entity was unable to raise future funds if required, its ability to realise its strategy could be significantly affected.

*Joint Operations*

The Consolidated Entity participates in its business activities through minority interest in joint operations operated by other companies, governed by operating agreements. Under these agreements, the Consolidated Entity does not control the approval of work programmes and budgets and other project partners may participate in activities without the Consolidated Entity's approval. The Consolidated Entity may also be required to participate in activities which it did not approve, have its interests diluted or not gain the benefit of an activity.

Project agreements can be subject to differences in interpretation and implementation with Operator responsibility for day to day operations. As a result, the Consolidated Entity may be exposed to operational and financial obligations outside of its control.

*Reserves and resources*

Estimating oil and gas reserves and resources is subject to significant uncertainties associated with technical data and the interpretation of that data, future commodity prices and development and operating costs. There can be no guarantee that the Consolidated Entity will successfully produce the volume of hydrocarbons that it estimates as reserves or that hydrocarbon resources will be successfully converted to reserves.

The Consolidated Entity's reserves and resources estimates are prepared by qualified, experienced engineers in accordance with the 2018 update to the Petroleum Resources Management System sponsored by the Society of Petroleum Engineers, World Petroleum Council, American Association of Petroleum Geologists and Society of Petroleum Evaluation Engineers (SPE-PRMS).

*Exploration and Development*

The Consolidated Entity's projects are at various stages of exploration, development and production. Oil and gas exploration and development activities can be high-risk undertakings and there can be no assurance that the exploration or development of any projects will result in the discovery of, and ability to realise any economic resources. Even if an apparently viable oil and gas resource is identified, there is no guarantee that it can be economically produced.

Exploration and development activities may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated reservoir problems which may affect production volumes and/or costs, industrial disputes, unexpected shortages and increases in the costs of plant and equipment, native title processes, changing government regulations and many other factors beyond the Consolidated Entity's control.

#### *Production*

The Consolidated Entity's oil and gas production is exposed to interruptions which may result from mechanical or technical failure, pipeline and other infrastructure access, project delays or other unforeseeable events. Restrictions on the movement and supply of personnel and products due to external influences such as geopolitical unrest or conflict may also cause interruption to production.

A significant interruption to production could result in loss of revenue and additional costs to repair or replace equipment.

#### *Regulatory risk*

The Consolidated Entity currently operates in Australia, Indonesia and New Zealand and is subject to changes in government policy or statutory changes that may affect our business operations and financial position. A change in government regime may significantly result in changes to fiscal, monetary, property rights and other issues which may result in a material adverse impact on Consolidated Entity's business and its operations.

Profitability may be affected by changes in government taxation and royalty policies or the interpretation and application of policies in our operating jurisdictions.

The Consolidated Entity monitors changes in relevant regulations and engages with regulators and governments to ensure policy and law changes are appropriately understood. Any failure to comply with or changes to applicable laws, regulations or permits, even if non-compliance is inadvertent, could result in material fines, penalties, changes in the cost of operations, additional investment or other liabilities. In extreme cases, non-compliance with or amendments applicable laws, regulations or permits could result in suspension of activities or forfeiture of one or more of the Consolidated Entity's projects.

#### *Access to infrastructure*

Our oil and gas sales can be dependent on access to third party owned infrastructure. Infrastructure failure, such as pipelines and processing facilities, increased tariffs or restrictions on access to third party infrastructure may have a material effect on financial performance.

The Consolidated Entity works with its project partners, customers and infrastructure suppliers to understand and mitigate the risk of delays or failure.

#### *Permit Risk*

All petroleum licences held by the Consolidated Entity are subject to the granting and approval of relevant government bodies and ongoing compliance with licence terms and conditions, including periodic requirements for renewal or extension.

The Consolidated Entity monitors project operators' tenure management processes and standard operating procedures to minimise the risk of losing tenure.

#### *Litigation*

The Consolidated Entity is not currently involved in any litigation. However, in the ordinary course of business we may become involved in litigation and disputes, for example with our partners, contractors or employees, over a broad range of matters. Any such litigation or dispute could involve significant economic costs and damage to relationships with partners or other stakeholders. Outcomes of any litigation may have an adverse impact on the Consolidated Entity's business, market reputation and financial condition and financial performance.

*Health Safety and Environmental risk*

Exploration, development, production and transportation of oil and gas involves a variety of risks which may impact the health and safety of personnel, the community and the environment.

Natural disasters, operational error and equipment failure, amongst other things, could result in oil and gas leaks or spills or loss of well control which may lead injury or loss of life, damage to equipment and facilities, legal liability and reputational damage. Losses or liabilities from such events could reduce revenue or increase costs and materially impact the Consolidated Entity's financial position.

The Consolidated Entity works with project operators to ensure processes and procedures are in place to minimise these risks and seeks to maintain appropriate insurance policies to mitigate against the financial effects of any incident.

*Climate change and the development of alternative energy sources*

The Consolidated Entity's operating environment is and will continue to be impacted by the continually developing impact of climate change and the response needed to ensure the well-being of the global community. The adverse impact of climate change continues to impact the search for and development of alternative energy sources to those historically based on the use of hydrocarbons in the generation of energy for industrial and private use.

The Consolidated Entity is conscious of its responsibilities in respect of minimising the impact of its operations on the environment, however, fundamental shifts in the commercial availability of alternative energy sources developed as a result of the adverse impact of climate change may impact the Consolidated Entity's future operational and financial performance.

*Digital and Cyber Security*

Any information technology system is potentially vulnerable to interruption and/or damage from a number of sources, including but not limited to computer viruses, cyber security attacks and other security breaches, power, systems, internet and data network failures, and natural disasters.

The Consolidated Entity is committed to preventing and reducing cyber security risks through outsourcing the IT environment which it utilizes to a reputable service provider.

*Reliance on key personnel*

The Consolidated Entity's success depends to a significant extent upon its key management personnel, as well as other staff and technical personnel including those employed on a contractual basis. The loss of the services of such personnel or the reduced ability to recruit additional personnel could have an adverse effect on the Consolidated Entity's performance.

The Consolidated Entity maintains a mix of permanent staff and expert consultants to advance its projects and ensure access to multiple skill sets. The remuneration policy is reviewed regularly to ensure it appropriately reflects current and expected employment conditions and best practices.

*Geopolitical Risk*

The Geopolitical conflicts can have significant global macro-economic impacts, including increasing instability in global energy prices. Related impacts include, but are not limited to volatility in commodity prices, currency movements, supply-chain and travel disruptions, disruption in banking systems and capital markets, increased costs and expenditures and cyberattacks. The development and conclusion of current conflicts are inherently uncertain and the consequences for the global economy and the Consolidated Entity's operations unpredictable.

The Board and management team continue to assess the potential impacts on the business, however given the continued uncertainties the future financial impact, if any, cannot be determined.

Refer to the Financial and Operations review preceding this Director's Report.

**Cue Energy Resources Limited**  
**Directors' report**  
**30 June 2025**

**Significant changes in the state of affairs**

On 1 July 2024, 1,370,359 options over the Company's fully paid ordinary shares expired, with an exercise price of \$0.09 (9 cents) per fully paid ordinary share.

On 3 September 2024, the Company issued 304,678 fully paid ordinary shares upon conversion of 1,218,706 options with an exercise price of \$0.078 (7.8 cents), with 914,028 immediately expiring utilising cashless exercise.

On 15 October 2024, the Company issued 3,411,549 options over fully paid ordinary shares to employees with an exercise price of \$0.12 (12 cents) per fully paid ordinary share and which expire on 1 July 2029.

On 3 March 2025, the Company issued 415,664 fully paid ordinary shares upon conversion of 1,428,843 options with an exercise price of \$0.078 (7.8 cents), with 1,013,179 immediately expiring utilising cashless exercise.

There were no other significant changes in the state of affairs of the Consolidated Entity during the financial year.

**Matters subsequent to the end of the financial year**

No matter or circumstance has arisen since 30 June 2025 that has significantly affected, or may significantly affect the Consolidated Entity's operations, the results of those operations, or the Consolidated Entity's state of affairs in future financial years.

**Likely developments and expected results of operations**

The following activities may affect the expected results of operations:

- Progress on Paus Biru and the Final Investment Decision;
- Further exploration and development drilling in existing company fields;
- Changes in New Zealand legislation and the impact it may have on the scope and funding of the Maari field decommissioning obligations;
- Continuing volatility in global energy markets; and
- Actively seeking to acquire new production opportunities.

**Environmental regulation**

Within the last year there have been no incidents, lost time injuries or significant spills within Cue Energy Resources Limited. Among the joint operations there have been incidents that have been reported and investigated by all the relevant parties. Cue Energy Resources Limited continues to monitor the progress of reported incidents and work with operators and joint operations partners to improve overall health and safety and minimise any impact on the environment.

**Information on directors**

Name:	Alastair McGregor
Title:	Non-Executive Chairman
Qualifications:	BEng, MSc
Experience and expertise:	Mr McGregor has been actively involved in the oil and gas sector since 2003. He is currently Chief Executive of O.G. Oil & Gas Limited, a company that holds directly or indirectly oil & gas exploration and production interests onshore and offshore. He leads the O.G. Energy Senior Management Committee, driving the strategy for Ofer Global's energy activities. Mr McGregor is also a director of Echelon Resources Ltd. In addition, Mr McGregor is Chief Executive of Omni Offshore Terminals Limited, a leading provider of floating, production, storage and offloading (FSO and FPSO) solutions to the offshore oil and gas industry. Omni's operations have spanned the globe from New Zealand, Australia, South East Asia, Middle East and South America. Prior to entering the oil and gas industry Mr McGregor spent 12 years as a banker with Citigroup and Salomon Smith Barney. Mr McGregor holds a BEng(Hons) and an MSc in Aeronautical Engineering.

**Remuneration report**

This Remuneration Report which has been audited, and which forms part of the Directors' Report, sets out information about the remuneration of Cue Energy Resources Limited's Directors and its senior management for the financial year ended 30 June 2025, in accordance with the Corporations Act 2001 and its regulations.

Key management personnel (KMP) are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including all directors.

The prescribed details for each person covered by this report are detailed below under the following headings:

- (A) Director and executive details
- (B) Remuneration policy
- (C) Details of remuneration

(D) Equity based remuneration

(E) Relationship between remuneration policy and company performance

**(A) Director and executive details**

The following persons acted as Directors of the company during or since the end of the financial year:

- Alastair McGregor (Non-Executive Chairman)
- Andrew Jefferies (Non-Executive Director)
- Peter Hood AO (Non-Executive Director)
- Richard Malcolm (Non-Executive Director)
- Rod Ritchie (Non-Executive Director)
- Samuel Kellner (Non-Executive Director)
- Marco Argentieri (Non-Executive Director)

The persons named above held their current position for the whole of the financial year and since the end of the financial year.

The term "Executive" is used in this Remuneration Report to refer to Matthew Boyall, Chief Executive Officer.

**(B) Remuneration policy**

The Board's policy for remuneration of Executives and Directors is detailed below.

Remuneration packages are set at levels that are intended to attract and retain high calibre directors and employees and align the interest of the Directors and Executives with those of the company's shareholders. The remuneration policy is established and implemented solely by the Board.

Remuneration and other terms and conditions of employment are reviewed annually by the Board having regard to performance and relevant employment market information. As well as a base salary, remuneration packages include superannuation, termination entitlements and fringe benefits.

The Board is conscious of its responsibilities in relation to the performance of the Company. Directors and Executives are encouraged to hold shares in the Company to align their interests with those of shareholders.

No remuneration or other benefits are paid to Directors or Executives by any subsidiary companies.

**(C) Details of remuneration**

The structure of Non-Executive Director and Executive remuneration is separate and distinct.

**Non-Executive Directors**

Remuneration of Non-Executive Directors is determined by the Board within the maximum amount approved by the shareholders from time to time. The amount currently approved is \$700,000, which was approved at the Annual General Meeting held on 24 November 2011. The Company's policy is to remunerate Non-Executive Directors at a fixed fee based on their time involvement, commitment and responsibilities. Remuneration for Non-Executive Directors is not linked to individual or company performance, however, to align Directors' interests with shareholders' interests, Non-Executive Directors are encouraged to hold shares in the Company. The Board retains the discretion to award options or performance rights to Non-Executive Directors based on the recommendation of the Board, which is always subject to shareholder approval.

**Executives**

Executives receive a mixture of fixed and variable pay and a blend of short- and long-term incentives as appropriate. Remuneration packages contain the following key elements:

- Fixed base cash salary and fees;
- Short term incentive (STI) programme benefits, including cash bonuses;
- Long term benefits in the form of long service leave;
- Superannuation entitlements post employment; and
- Equity settled benefits, including but not limited to long term incentives in the form of options and/or performance rights.

### Fixed compensation

Fixed compensation consists of base salary (which is calculated on a total cost base and including any fringe benefits tax ("FBT") charges related to employee benefits including motor vehicles), as well as employer contributions to superannuation funds.

The base salary is reflective of market rates for companies of similar size and industry which is reviewed annually to ensure market competitiveness. The Board last reviewed the salaries paid to peer company executives in determining the salary of the Company's KMP at the end of the 2022 financial year. This base salary is fixed remuneration and is not subject to performance of the company. Base salary is reviewed annually and adjusted on 1 July each year as required. There is no guaranteed base salary increase included in any executive's contracts.

### Cash bonuses

A cash bonus was paid to the CEO during this financial year on the achievement of his annual STI, based on actual performance against key performance indicators (KPIs).

### Employment contracts

Remuneration and other terms of employment for key executive Matthew Boyall is formalised in a service agreement. Details of the agreement is as follows:

Matthew Boyall

Title: Chief Executive Officer

Original Agreement effective from 1 July 2017, with salary terms revised on 3 September 2024.

Term: Permanent employment contract, no fixed terms.

Details: Base salary of \$441,842 per annum plus superannuation, up to the super guarantee maximum employer contribution, to be reviewed annually by the Board. Mr Boyall is also entitled to short-term incentive up to 30% of his base salary at the discretion of the Board at the end of each financial year dependent on the success of meeting key deliverables. Mr Boyall's entitlements to long-term incentives is determined at the Board sole discretion.

Notice period: 3 months

Compensation levels are reviewed each year to take into account cost of living changes, any change in the scope of the role performed and any changes to meet the principles of the compensation policy.

Details of the nature and amount of each major element of remuneration of each Director of the Company and other Key Management Personnel of the Consolidated Entity are:

\* Alastair McGregor, Andrew Jefferies, Samuel Kellner and Marco Argentieri were not directly remunerated by the Company during the year ended 30 June 2025.

**(D) Equity based remuneration**

*Overview of share options*

**Cue Energy Resources Limited**  
**Directors' report**  
**30 June 2025**

The Board in their meeting held on 24 June 2019 approved the Employee Share Option Plan ('ESOP'), which was subsequently approved by shareholders at 2019 Annual General Meeting.

The ESOP has been developed to provide the greatest possible flexibility in choice to the Board in implementing the executive incentive schemes. The ESOP enables the Board to offer employees a number of Options.

A summary of material terms of the ESOP is set out as follows:

- the ESOP sets out the framework for the offer of Options by the Company, and is typical for an ESOP;
- in making its decision to issue Options, the Board may decide the number of securities and the vesting conditions which are to apply in respect of the securities. The Board has flexibility to issue Options having regard to a range of potential vesting criteria and conditions;
- in certain circumstances, unvested Options will immediately lapse and any unvested Shares held by the participant will be forfeited if the relevant person is a "bad leaver" as distinct from a "good leaver". Unless the Board determines otherwise at its sole discretion, Options held by good leavers will expire upon cessation of employment;
- if a participant acts fraudulently or dishonestly or is in breach of their obligations to the Company or its subsidiaries, the Board may determine that any unvested Options held by the participant immediately lapse and that any unvested Shares held by the participant be forfeited;
- in certain circumstances Options can vest early upon a change of control event as defined under the Plan rules;
- the total number of Options and Shares which may be offered by the Company under these Rules shall not at any time exceed 5% of the Company's total issued Shares when aggregated with the number of Options and Shares issued or that may be issued as a result of offers made at any time during the previous three year period under an employee incentive scheme;
- the Board has discretion to impose restrictions (except to the extent prohibited by law or the ASX Listing Rules) on Shares issued or transferred to a participant on vesting of an Option or a Performance Right, and the Company may implement appropriate procedures to restrict a participant from so dealing in the Shares; and
- the Board is granted a certain level of discretion under the Employee Incentive Programme (EIP), including the power to amend the rules under which the EIP is governed and to waive vesting conditions, forfeiture conditions or disposal restrictions, including but not limited to the execution of the EIP's terms upon termination of employment.

The options will vest on the date determined by the Board and as specified in the Invitation Letter.

3,411,549 options were granted under the ESOP during FY 2025 (FY 2024: 4,640,759). During the year, the Company issued 720,342 ordinary fully paid shares with an exercise price of \$0.078 (7.8 cents) which were settled utilising the cashless exercise.

**Share-based compensation**

*Issue of shares*

During FY 2025, 415,664 fully paid ordinary shares were issued to Matthew Boyall, the Chief Executive Officer upon the exercise on a cashless basis of 1,428,843 options granted as part of his compensation.

*Options*

The terms and conditions of each grant of options over ordinary shares affecting remuneration of KMP in this financial year or future reporting years are as follows:

Name	Number of Options granted	Grant Date	Vesting date and exercisable date	Expiry date	Exercise price (Cents)	Fair value at grant date (Cents)
Matthew Boyall	1,102,607	16 July 2020	1 July 2023	1 July 2025	11.700	5.100
Matthew Boyall	1,428,843	23 July 2021	23 July 2024	23 July 2026	7.800	3.900
Matthew Boyall	1,714,612	30 August 2022	1 July 2025	1 July 2027	8.900	3.200
Matthew Boyall	2,129,386	8 September 2023	1 July 2026	1 July 2028	7.200	3.150
Matthew Boyall	1,325,526	15 October 2024	1 July 2027	1 July 2029	12.000	5.110

Options granted carry no dividend or voting rights.

**(E) Relationship between remuneration policy and company performance**

**Company performance review**

The tables below set out summary information about the company's earnings and movements in shareholder wealth and key management remuneration for the five years to 30 June 2025.

	2025 \$'000	2024 \$'000	2023 \$'000	2022 \$'000	2021 \$'000
Production revenue from continuing operations	54,841	49,659	51,605	44,439	22,449
Profit/(loss) before income tax expense from continuing operations	19,658	25,322	19,881	21,756	(7,442)
Profit/(loss) after income tax expense	6,316	14,189	15,211	16,068	(12,743)
Total KMP remuneration settled by the Consolidated Entity	1,233	1,121	821	741	659

	2025	2024	2023	2022	2021
Share price at start of year (cents)	10.50	5.60	6.50	6.00	9.50
Share price at end of year (cents)	11.50	10.50	5.60	6.50	6.00
Basic earnings/(loss) per share (cents)	1.53	2.03	2.18	2.30	(1.83)
Diluted earnings/(loss) per share (cents)	1.52	2.03	2.18	2.30	(1.83)
Dividend (\$'000)	13,978	13,967	-	-	-

The Company remuneration policy also seeks to reward staff members on achieving non-financial key performance indicators, including safety and operational performance.

**Remuneration Report Voting at Annual General Meeting**

The Company received 99.87% of votes in support of its FY2024 remuneration report at the 2024 Annual General Meeting.

**Additional disclosures relating to key management personnel**

**Shareholding**

The number of shares in the company held during the financial year by each director and other members of key management personnel of the Consolidated Entity, including their personally related parties, is set out below:

	Balance at the start of the year	Additions	Disposals/ other	Balance at the end of the year
<i>Ordinary shares*</i>				
<i>Non-Executive Directors</i>	-	-	-	-
Andrew Jefferies	8,000	-	-	8,000

23/07/2021	01/07/2024	23/07/2026	7.80	4,005,799
30/08/2022	01/07/2025	01/07/2027	8.90	3,598,698
08/09/2023	01/07/2026	01/07/2028	7.20	4,640,759
15/10/2024	01/07/2027	01/07/2029	12.00	3,411,549

No person entitled to exercise the options had or has any right by virtue of the option to participate in any share issue of the company or of any other body corporate.

**Shares issued on the exercise of options**

During FY2025 and up to the date of this report, 2,647,549 options with an expiry date of 22 July 2026 and an exercise price of \$0.078 (7.8 cents) per fully paid ordinary share were exercised on a cashless basis, as a result of which 720,342 fully paid ordinary shares in the Company were issued.

**Directors' insurance and indemnification of Directors and auditors**

During the financial year, the company paid a premium in respect of a contract insuring the directors of the company, the company secretary, and all executive officers against a liability incurred as a director, company secretary or executive officer to the extent permitted by the Corporations Act 2001. In accordance with commercial practice, the insurance policy prohibits disclosure of the terms of the policy, including the nature of the liability insured against and the amount of the premium.

The company has not otherwise, during or since the end of the financial year indemnified or agreed to indemnify the auditor of the company or any related body corporate against a liability incurred as an officer or auditor.

**Proceedings on behalf of the company**

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the company, or to intervene in any proceedings to which the company is a party for the purpose of taking responsibility on behalf of the company for all or part of those proceedings.

**Non-audit services**

Details of the amounts paid or payable to the auditor for non-audit services provided during the financial year by the auditor are outlined in note 17 to the financial statements.

The Company may decide to employ the auditor on assignments additional to its statutory audit duties where the auditor's expertise and experience with the Company are important.

**Cue Energy Resources Limited**  
**Directors' report**  
**30 June 2025**

The Board of Directors pre-approves all non-audit services and is satisfied that the provision of the non-audit services is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001. The Directors are satisfied that the provision of non-audit services by the auditor, did not compromise the audit independence requirement, of the Corporations Act 2001, based on advice received from the Audit and Risk Committee, for the following reasons:

- all non-audit services have been reviewed and approved to ensure that they do not impact the integrity and objectivity of the auditor; and
- none of the services undermine the general principles relating to auditor independence as set out in APES 110 Code of Ethics for Professional Accountants issued by the Accounting Professional and Ethical Standards Board, including reviewing or auditing the auditor's own work, acting in a management or decision-making capacity for the company, acting as advocate for the company or jointly sharing economic risks and rewards.

**Officers of the company who are former partners of KPMG**

There are no officers of the company who are former partners of KPMG.

**Rounding of amounts**

The Company is a company of the kind referred to in ASIC Legislative Instrument 2016/191, and in accordance with the Class Order amounts in the Directors' Report and the Financial Report are rounded off to the nearest thousand dollars, unless otherwise indicated.

**Auditor's independence declaration**

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 is set out immediately after this directors' report and forms part of the directors' report.

**Auditor**

In accordance with the provisions of the Corporations Act 2001 the Company's auditor, KPMG, continues in office.

This report is made in accordance with a resolution of directors, pursuant to section 298(2)(a) of the Corporations Act 2001.

On behalf of the Board

---

Alastair McGregor  
Non-Executive Chairman

22 August 2025

# Lead Auditor's Independence Declaration under Section 307C of the Corporations Act 2001

To the Directors of Cue Energy Resources Limited

I declare that, to the best of my knowledge and belief, in relation to the audit of Cue Energy Resources Limited for the financial year ended 30 June 2025 there have been:

- i. no contraventions of the auditor independence requirements as set out in the *Corporations Act 2001* in relation to the audit; and
- ii. no contraventions of any applicable code of professional conduct in relation to the audit.

### **Note 1. General information**

The financial statements cover Cue Energy Resources Limited as a Consolidated Entity consisting of Cue Energy Resources Limited and the entities it controlled at the end of, or during, the year, hereinafter collectively referred to as the Consolidated Entity. The financial statements are presented in Australian dollars, which is Cue Energy Resources Limited's functional and presentation currency.

Cue Energy Resources Limited is a listed public company limited by shares, incorporated and domiciled in Australia, whose shares are publicly traded on the Australian Securities Exchange.

As detailed in note 16, Cue Energy Resources Limited's parent entity is Echelon Resources Limited (Echelon) (formerly known as New Zealand Oil & Gas Limited), a company incorporated in New Zealand and its ultimate parent entity is O.G. Oil & Gas (Singapore) Pte. Ltd. (OGOG), a company incorporated in Singapore.

A description of the nature of the Consolidated Entity's operations and its principal activities are included in the directors' report, which is not part of the financial statements.

The financial statements were authorised for issue, in accordance with a resolution of directors, on 22 August 2025.

### **Note 2. Material accounting policy information**

The accounting policies that are material to the Consolidated Entity are set out either in the respective notes or below. The accounting policies adopted are consistent with those of the previous financial year, unless otherwise stated.

#### **(a) Operations and principal activities**

Operations comprise petroleum exploration, development and production activities.

#### **(b) Statement of compliance**

The financial report is a general purpose financial report presented in Australian dollars which has been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ("AASB") and the Corporations Act 2001, as appropriate for for-profit oriented entities. International Financial Reporting Standards ("IFRSs") form the basis of Australian Accounting Standards adopted by the AASB. The financial reports of the consolidated entity also comply with IFRS and interpretations adopted by the International Accounting Standards Board.

The accounting policies set out below have been applied consistently to all periods presented in this report.

#### **(c) Basis of preparation**

The Consolidated Entity is of a kind referred to in *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191* and in accordance with that instrument, amounts in the consolidated financial statements and directors' report have been rounded off to the nearest thousand dollars, unless otherwise stated.

The consolidated financial statements have been prepared on a going concern basis using the historical cost convention.

In accordance with the Corporations Act 2001, these financial statements present the results of the Consolidated Entity only. Supplementary information about the parent entity is disclosed in note 19.

**Note 2. Material accounting policy information (continued)**

**(d) Principles of consolidation**

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Cue Energy Resources Limited ("company" or "parent entity") as at 30 June 2025 and the results of all subsidiaries for the year then ended. Cue Energy Resources Limited and its subsidiaries together are referred to in this financial report as the Group or Consolidated Entity.

Subsidiaries are all those entities over which the Consolidated Entity has control. The Consolidated Entity controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect these returns through its power to direct the activities of the entity. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Consolidated Entity controls another entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Consolidated Entity. They are de-consolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Consolidated Entity.

Investments in subsidiaries are accounted for at cost in the standalone financial statements of the parent entity, Cue Energy Resources Limited.

**(e) Production revenue**

Revenue from the sale of oil and gas is recognised at the point in time when control of the product is transferred to the customer, which is generally when the product is physically transferred into a vessel, pipe or other delivery mechanism and the customer accepts the product. Consequently, the Consolidated Entity's performance obligations are considered to relate only to the sale of oil or gas, with each unit considered to be a separate performance obligation under the contractual arrangements in place.

Under the terms of the relevant production sharing arrangements, the Consolidated Entity is entitled to its participating share of oil or gas based on the Consolidated Entity's working interest. Revenue from contracts with customers is recognised based on the actual volumes sold to customers.

The Consolidated Entity's sales of crude oil are priced based on market prices and sales of gas are priced based on different contractual arrangements which include fixed and market prices.

**(f) Cash and cash equivalents**

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. For the statement of cash flows presentation purposes, cash and cash equivalents also includes bank overdrafts, which are shown within borrowings in current liabilities on the statement of financial position.

**(g) Trade and other payables**

Trade and other payables represent the principal amounts outstanding at the reporting date plus, where applicable, any accrued interest. Trade payables are normally paid within 30 days, and due to their short-term nature are generally unsecured and not discounted.

**(h) Inventories**

Inventories consist of hydrocarbon stock. Inventories are valued at the lower of cost and net realisable value. Cost is determined on a weighted average basis and includes direct costs and an appropriate portion of fixed production overheads where applicable.

**(i) Finance costs**

Finance costs attributable to qualifying assets are capitalised as part of the asset. All other finance costs are expensed in the period in which they are incurred.

--

**Note 2. Material accounting policy information (continued)**

**(j) Goods and Services Tax ('GST') and other similar taxes**

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the consolidated statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

**(k) Foreign currency**

*Functional and presentation currency*

The functional currencies of Group companies is the currency of the primary economic environment in which it operates. The consolidated financial statements are presented in Australian dollars, the Consolidated Entity's presentation currency.

*Transactions and balances*

Transactions in foreign currencies of entities within the Consolidated Entity are translated into functional currency at the rate of exchange ruling at the date of the transaction. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate at the date when fair values were determined.

Foreign currency monetary items that are outstanding at the reporting date (other than monetary items arising under foreign currency contracts where the exchange rate for that monetary item is fixed in the contract) are translated using the spot rate at the end of financial year.

*Foreign operations*

The results and financial position of Consolidated Entity's foreign operations are translated into its presentation currency using the following procedures:

- (a) assets and liabilities for each statement of financial position presented (i.e. including comparatives) shall be translated at the closing rate at the date of that statement of financial position;
- (b) income and expenses for each statement presenting profit or loss and other comprehensive income (i.e. including comparatives) shall be translated at average exchange rates for the year; and
- (c) all resulting exchange differences shall be recognised in other comprehensive income.

**(l) Advances paid for rehabilitation works**

Advances paid for rehabilitation works represent amounts paid to special purpose funds established with the primary objective of meeting future rehabilitation obligations and are recognised and measured in accordance with AASB Interpretation 5 Rights to Interests arising from Decommissioning, Restoration and Environmental Rehabilitation Funds (AASBI 5). AASBI 5 requires restoration provisions and contributions to funds to be separately disclosed in the Consolidated Entity's statement of financial position.

**(m) Contract assets and liabilities**

Contract assets and liabilities are recognized and measured in accordance with AASB 15 Revenue from Contracts with Customers.

*Contract assets*

Contract assets represent rights to consideration for performance obligations satisfied to date, which will be recognised as trade receivables when the right to invoice becomes unconditional.

## **Note 2. Material accounting policy information (continued)**

### *Contract liabilities*

Contract liabilities represent the Consolidated Entity's obligation to transfer gas to customers and are recognised when a customer pays consideration or when a receivable is recognised reflecting its unconditional right to consideration before the Consolidated Entity has satisfied its performance obligations in respect of the transfer of the goods or services to the customer.

The Consolidated Entity assumed performance obligations for the delivery of 'gas not taken' by its sole customer in the Dingo field. Under the take or pay arrangement, the Consolidated Entity has the obligation to provide make up gas ("MUG") within the contractually defined volumes, which was not previously taken by the customer. The customer must take the future delivery of gas no later than 2035.

### **(n) Loans and borrowings**

Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

### **(o) Accounting policy for employee benefits**

The following liabilities arising in respect of employee benefits are measured at their nominal amounts:

- wages and salaries and annual leave expected to be settled within twelve months of the reporting date; and
- other employee benefits expected to be settled within twelve months of the reporting date.

All other employee benefit liabilities expected to be settled more than 12 months after the reporting date are measured at the present value of the estimated future cash outflows in respect of services provided up to the reporting date. Liabilities are determined after taking into consideration estimated future increase in wages and salaries and past experience regarding staff departures. Related on-costs are included.

### **(p) New or amended Accounting Standards and Interpretations adopted**

The Consolidated Entity has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period. There was no impact upon adoption of these standards.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

## **Note 3. Critical accounting estimates and judgements**

The preparation of a financial report in conformity with Australian Accounting Standards requires management to make judgements in the application of accounting standards, make certain assumptions that affect the application of policies and consider and conclude on sources of and apply estimation uncertainties which affect the reported amounts of assets, liabilities, income and expenses.

The judgements made, assumptions applied and the consideration of sources of estimation uncertainty, are based on the application of historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of concluding on the carrying values of assets and liabilities that may not be readily apparent from other sources. Actual results may differ from these estimates. These accounting policies have been consistently applied by each entity in the Consolidated Entity, and the judgements made, assumptions applied and consideration of sources of estimation uncertainty are reviewed on an ongoing basis.

The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying values of assets and liabilities within the next financial year are discussed below.

**Note 3. Critical accounting estimates and judgements (continued)**

*(i) Recovery of deferred tax assets*

Management recognise deferred tax assets on unutilised carry forward tax losses if management considers it is probable that future tax profits will be available to utilise the unused tax losses (refer to note 9).

Management are required to make assumptions on and consider inherent uncertainties in respect of the various inputs used in the estimation of future taxable income against which unutilised losses may be applied. These assumptions include but are not limited to the nature, timing and extent of project development and reserves, production and sales performance, energy prices where not contractually fixed and which are subject to global macroeconomic factors and inflation and its impact on future tax deductions. The inherent estimation uncertainty when forecasting future operational and financial performance also directly the actual generation of future taxable income, which may differ to the estimated taxable income and associated deferred tax asset.

*(ii) Impairment of production properties*

Production properties impairment testing is required when there is an indicator for impairment. Impairment testing requires an estimation of recoverable amount, using either fair value less costs to sell or a value-in-use model for the respective cash generating units (CGUs).

Management is required to make certain assumptions on reserves, future production volumes, pricing of its energy products, cost estimates, exchange rates and how they impact on future cashflows, where required, the costs to sell and in respect of the inputs utilised in defining an appropriate discount rate.

These inputs and assumptions are inherently uncertain, and management review their accuracy and appropriateness periodically.

*(iii) Useful life of production properties and their amortisation*

Estimates of reserve quantities and future production volumes are based on certain assumptions and subject to inherent estimation uncertainties. These factors are critical elements of the calculation of the amortisation of production property assets.

*(iv) Estimates of reserve quantities*

The estimated quantities of Consolidated Entity's reported Proven and Probable hydrocarbon reserves are integral to the calculation of the amortisation expense relating to Production Property Assets and to the assessment of possible impairment of these assets. Estimated reserve quantities are based upon certain interpretations of geological and geophysical models and assessments of the technical feasibility and commercial viability of producing the reserves. These assessments require assumptions to be made regarding future development and production costs, commodity prices, exchange rates and fiscal regimes. The estimates of reserves may change from period to period as the economic assumptions used to estimate the reserves change from period to period, and as additional geological data is generated during the course of operations. Reserves estimates are prepared in accordance with the Consolidated Entity's policies and procedures for reserves estimation, which conform to guidelines prepared by the Society of Petroleum Engineers.

*(v) Restoration (rehabilitation or rehab) provisions*

Provisions for future environmental restoration are recognised where there is a present obligation as a result of exploration, development, production, transportation or storage activities having been undertaken, and it is probable that an outflow of economic benefits will be required to settle the obligation. The estimated future obligations include the costs of removing facilities, abandoning wells and restoring the affected areas in accordance with the terms of the respective permits and relevant legislation in the various jurisdictions in which the Consolidated Entity operates. There is inherent uncertainty in the definition of the works undertaken, technology used to complete the works, the estimation of the relevant costs associated with the defined works and the timing of settlement of restoration obligations. Factors that also impact the restoration provision includes changes in interest rate and foreign exchanges rate. Details of restoration provisions are disclosed in note 12.

### **Note 3. Critical accounting estimates and judgements (continued)**

#### *(vi) Capitalised exploration and evaluation costs*

Exploration and evaluation costs have been capitalised on the basis that the consolidated entity expects to commence commercial production in the future, from which time the costs will be amortised in proportion to the depletion of the mineral resources. Key judgements are applied in considering costs to be capitalised which includes determining expenditures directly related to these activities and allocating overheads between those that are expensed and capitalised. In addition, costs are only capitalised that are expected to be recovered either through successful development or sale of the relevant mining interest. Factors that could impact the future commercial production at the mine include the level of reserves and resources, future technology changes, which could impact the cost of mining, future legal changes and changes in commodity prices. To the extent that capitalised costs are determined not to be recoverable in the future, they will be written off in the period in which this determination is made.

#### *(vii) Development assets*

Development costs have been capitalised on the basis that the Consolidated Entity expects to commence commercial production in the future, from which time the costs will be amortised in proportion to the depletion of reserves. Key judgements are applied in considering costs to be capitalised that are expected to be recovered either through successful development or sale of the relevant assets. The primary assumption made in respect of development assets is that these assets will be able to be realised through the successful development of the relevant tenement or through its sale.

To the extent that capitalised costs are determined not to be recoverable in the future, they will be written off in the period in which this determination is made.

### **Note 4. Financial reporting by segments**

#### **Segment Information**

AASB 8 requires operating segments to be identified on the basis of internal reports about components of the Group that are regularly reviewed and used by the Board of Directors (who are identified as the Chief Operating Decision Makers ("CODM")) in assessing performance and in determining the allocation of resources.

The CODM assesses the performance of the operating segments based upon EBITDAX, adjusted to exclude business development costs, exploration and evaluation expenses, share based payments and one-off expenses, which allows peer comparison when assessing performance. The accounting policies adopted for internal reporting to the CODM are consistent with those adopted in the Group's financial statements.

The Consolidated Entity operates in four principal segments: Onshore Australia, Maari in New Zealand and Sampang and Mahato in Indonesia. The Consolidated Entity has a distinct corporate function which has been presented separately in order to reconcile to the statutory results.

#### *Australia*

The Consolidated Entity, through wholly owned subsidiaries, Cue Mereenie Pty Ltd, Cue Palm Valley Pty Ltd and Cue Dingo Pty Ltd, holds 3 permits for Onshore Australia activities in the Amadeus Basin in the Northern Territory. For details of interests in joint operations refer to note 21.

#### *New Zealand*

The Group, through its wholly owned subsidiary, Cue Taranaki Pty Ltd, holds a 5% interest in petroleum production property, PMP38160 (Maari) in New Zealand.

#### *Indonesia*

The Group, through its wholly owned subsidiary, Cue Sampang Pty Ltd, holds a 15% interest in the Sampang PSC gas production property and through Cue Mahato Pty Ltd, holds a 11.25% interest in the Mahato PSC oil production property.

Information regarding the Group's reportable segments is presented below:

Note 4. Financial reporting by segments (continued)

	<b>30 June 2025</b>	<b>30 June 2024</b>
	<b>\$'000</b>	<b>\$'000</b>
<i>Deferred tax not recognised</i>		
Deferred tax not recognised comprises temporary differences attributable to:		
Tax losses	<u>22,233</u>	<u>19,421</u>
Net deferred tax not recognised	<u>22,233</u>	<u>19,421</u>

At 30 June 2025, the Consolidated Entity had \$74.11 million in unutilised carry forward losses, the tax effect of which is \$22.23 million. The potential tax benefit has not been recognised in the statement of financial position as the recovery of this benefit is uncertain.

*Accounting policy for Income tax*

The income tax expense for the year is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax balances attributable to amounts recognised directly in equity are also recognised directly in equity.

Cue Energy Resources Limited (the 'head entity') and its wholly-owned Australian controlled entities have formed an income tax consolidated group under the tax consolidation regime effective 1 July 2010. As a consequence, all members of the tax consolidated group are taxed as a single entity.

**Note 9. Income tax expense (continued)**

Cue Taranaki Pty Ltd is subject to the provisions of its Petroleum Mining Permit (the Permit) which, in conjunction with the Minerals Programme for Petroleum (1995) Act and Crown Minerals (Royalties for Petroleum) Regulations 2013 (collectively the Legislation), defines the basis of provisional royalty payments made each reporting period. The provisions of the Permit define a hybrid royalty system whereby the minimum royalty payment, is the higher of 5% of revenues or 20% of the provisional accounting profit (APR), as defined in the legislation.

The Consolidated Entity recognises the minimum royalty payment as a royalty expense, included in the statement of profit or loss and other comprehensive income as production costs, with any excess of the APR over the minimum royalty payment presented as an income tax expense, in accordance with AASB 112. Deferred taxes have been recognised in respect of the application of the terms of the Legislation to timing differences arising between the recognition and measurement criteria in the Legislation and the application of Australian Accounting Standards. These deferred tax balances are in addition to balances recognised on temporary timing differences generated through the application of the respective corporate income tax legislation in the jurisdictions in which the Consolidated Entity operates.

**Note 10. Current assets - trade and other receivables**

	<b>Consolidated</b>	
	<b>30 June 2025</b>	<b>30 June 2024</b>
	<b>\$'000</b>	<b>\$'000</b>
Trade receivables	9,317	5,808
Other receivables	2,089	2,126
	<u>11,406</u>	<u>7,934</u>
Prepayments	221	200
	<u>11,627</u>	<u>8,134</u>

*Allowance for expected credit losses*

The Group applies the AASB 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due.

The consolidated entity has not recognised any losses in profit or loss in respect of the expected credit losses for the year ended 30 June 2025 (30 June 2024: Nil).

The ageing of trade and other receivables at the reporting date was as follows:

	<b>Consolidated</b>	
	<b>30 June 2025</b>	<b>30 June 2024</b>
	<b>\$'000</b>	<b>\$'000</b>
Not overdue	7,169	6,192
Less than one month	4,237	1,742
	<u>11,406</u>	<u>7,934</u>

Trade and other receivables are not considered impaired and relate to a number of independent customers for whom there is no recent history of default.

**Note 11. Non-current assets - production properties**

	<b>Consolidated</b>	
	<b>30 June 2025</b>	<b>30 June 2024</b>
	<b>\$'000</b>	<b>\$'000</b>
<b>Net accumulated cost incurred on areas of interest</b>		
<b>Joint operation production assets</b>		
Sampang	2,164	2,239
Maari	13,009	13,876
Mahato	24,369	15,024
Palm Valley	5,403	5,952
Mereenie	19,089	18,070
Dingo	7,117	7,856
	<u>71,151</u>	<u>63,017</u>
Balance as at 30 June	<u>71,151</u>	<u>63,017</u>

*Reconciliations*

A reconciliation of the written down values at the beginning and end of the current and previous financial year are set out below:

	<b>Consolidated</b>	
	<b>30 June 2025</b>	<b>30 June 2024</b>
	<b>\$'000</b>	<b>\$'000</b>
<b>Production properties</b>		
Balance at 1 July	63,017	62,289
Additions during the year	16,502	7,305
Changes in restoration provision – production (note 12)	735	(550)
Amortisation expense	(9,013)	(6,212)
Contract liabilities reversed	(368)	161
Changes in foreign currency translation	278	24
	<u>71,151</u>	<u>63,017</u>
Closing balance 30 June	<u>71,151</u>	<u>63,017</u>

*Accounting policy for production properties*

Production properties are carried at the reporting date at cost less accumulated amortisation and accumulated impairment losses. Production properties represent the accumulation of all exploration, evaluation, development and acquisition costs in relation to areas of interest in which production licences have been granted.

Amortisation of costs is performed on the basis which best reflects the consumption of future economic benefits. In the Onshore Australia assets, physical assets are amortised on the straight-line basis whilst all other production properties are amortised on the unit-of-production basis, separate calculations being made for each resource. The unit-of-production basis results in an amortisation charge proportional to the depletion of economically recoverable reserves (comprising both proven and probable reserves) and is expensed through the statement of profit or loss and other comprehensive income.

Amounts received during the exploration, evaluation, development or construction phases which are in the nature of reimbursement or recoupment of previously incurred costs are offset against such capitalised costs.

*Accounting policy for impairment*

The carrying amounts of the Consolidated Entity's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated.

An impairment loss is recognised whenever the carrying amount of an asset or its cash generating unit exceeds the recoverable amount. Impairment losses are recognised in profit or loss, unless an asset has previously been revalued, in which case the impairment loss is recognised as a reversal to the extent of that previous revaluation with any excess recognised through profit or loss.

**Note 11. Non-current assets - production properties (continued)**

Impairment losses and reversals are recognised in respect of cash-generating units are allocated to reduce the carrying amount of the assets in the unit (group of units) on a pro rata basis.

*Accounting policy for calculation of recoverable amount*

For oil and gas assets the estimated future cash flows are based on either the fair value less costs to sell or the value-in-use calculations, which use estimates of hydrocarbon reserves, future production profiles, commodity prices, operating costs and any future development costs necessary to produce the reserves. Estimates of future commodity prices are based on contracted prices where applicable or based on estimates of forward market prices. The recoverable amount of cash generating units is the greater of their fair value less cost to dispose and value-in-use.

In assessing value-in-use, the estimated future cash flows are discounted to their present value using a post-tax discount rate based on assumptions that reflect current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

The restoration provision is deducted from the carrying value of the asset as the cost of restoration is included in its cost base. This adjustment is required to allow a true reflection of its carrying value against its recoverable value.

**Development assets**

**Net accumulated cost incurred on areas of interest**  
**Development assets**

<b>Consolidated</b>	
<b>30 June 2025</b>	<b>30 June 2024</b>
<b>\$'000</b>	<b>\$'000</b>
6	2
30,402	28,607
<u>30,408</u>	<u>28,609</u>

Movements in restoration provision during the financial year are set out below:

**Consolidated - 30 June 2025**

Carrying amount at the start of the year  
Change in provisions recognised  
Unwinding of provision  
Impact of foreign currency translation

Carrying amount at the end of the year

Restoration provisions \$'000
28,607
735
691
<u>369</u>
<u>30,402</u>

**Note 12. Non-current liabilities - provisions (continued)**

	<b>Consolidated</b>	
	<b>30 June 2025</b>	<b>30 June 2024</b>
	<b>\$'000</b>	<b>\$'000</b>
Restoration provisions	30,402	28,607
Advances paid for restoration works	(6,388)	(6,069)
Net unfunded restoration provisions	<u>24,014</u>	<u>22,538</u>

In accordance with legislative obligations in some jurisdictions in which the Consolidated Entity operates, contributions are made to special purpose funds established solely for the purpose of financing future restoration works. Any amounts which have been funded are not available for general use and restricted solely for the purpose of funding future restoration works. As at 30 June 2025, \$6.39 million (30 June 2024: \$6.07 million) has been contributed to such funds in respect of the Sampang asset in Indonesia.

*Accounting policy for provisions*

A provision is recognised in the statement of financial position when the Group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risk specific to the liability.

*Restoration provision*

The expected timing of outflows for restoration liabilities is not within 12 months from the reporting date.

The provision of future restoration costs is the best estimate of the present value of the future expenditure required to settle the restoration obligation at the reporting date, based on current legal requirements. Future restoration costs are reviewed annually and any changes in the estimate are reflected in the present value of the restoration provision at the reporting date, with a corresponding change in the cost of the associated asset.

When the liability is initially recognised, the present value of the estimated costs is capitalised by increasing the carrying amount of the related oil and gas assets to the extent that it was incurred by the development/construction of the field, any subsequent changes to the provision, excluding the unwinding of interest in producing assets, commensurately changes the carrying amount of the related oil and gas asset.

**Note 13. Equity - contributed equity**

	<b>Consolidated</b>			
	<b>30 June 2025</b>	<b>30 June 2024</b>	<b>30 June 2025</b>	<b>30 June 2024</b>
	<b>Shares</b>	<b>Shares</b>	<b>\$'000</b>	<b>\$'000</b>
Ordinary shares - fully paid	<u>699,092,624</u>	<u>698,372,282</u>	<u>152,630</u>	<u>152,543</u>

Ordinary shares entitle the holder to vote, either in person or by proxy at a meeting of the Company, receive dividends as declared and, in the event of winding up the Company, to participate in the proceeds from the sale of all surplus assets in proportion to the number of and amounts paid on the shares held. The Company has an unlimited authorised capital and the shares have no par value.

*Capital management*

When managing capital, management's objective is to ensure the entity continues as a going concern as well as maintaining optimal return for shareholders and benefits for other stakeholders.

Management will assess the capital structure of the entity to take advantage of favourable costs of capital or high returns on assets. Management may recommend declaring a dividend to be paid to shareholders, returning capital to shareholders or issuing new shares

**Note 13. Equity - contributed equity (continued)**

There has been no change during the year to the strategy adopted by management to control the capital of the entity.

On 22 August 2025, the Company's Board of Directors approved the declaration of a final dividend of \$0.005 (0.5 cent) per fully paid ordinary share, totalling approximately \$3.5 million. This final dividend has been declared as a Conduit Foreign Income (CFI), unfranked dividend and will be paid on 25 September 2025.

On 25 February 2025, the Company's Board of Directors approved the declaration of an interim dividend of \$0.01 (1 cent) per fully paid ordinary share, totalling approximately \$7 million. This interim dividend was declared as a Conduit Foreign Income (CFI), unfranked dividend and paid on 26 March 2025.

The gearing ratio is nil at 30 June 2025 and 30 June 2024.

*Accounting policy for contributed equity*

Ordinary share capital is recognised at the fair value of the consideration received by the Company. Any transaction costs arising on the issue of ordinary shares are recognised directly in equity as a reduction of the share proceeds received. Ordinary share capital bears no special terms or conditions affecting income or capital entitlements of the shareholders.

**Note 14. Equity - reserves**

*Movements in reserves*

Movements in each class of reserve during the current and previous financial year are set out below:

<b>Consolidated</b>	<b>Foreign currency reserve \$'000</b>	<b>Options reserve \$'000</b>	<b>General reserve \$'000</b>	<b>Total \$'000</b>
Balance at 1 July 2023	1,528	647	4,218	6,393
Foreign currency translation	388	-	-	388
Share-based payments	-	(27)	-	(27)
Transfer from accumulated profits	-	-	61,440	61,440
Transfer upon exercise of options	-	(127)	-	(127)
Dividends declared	-	-	(13,967)	(13,967)
Balance at 30 June 2024	1,916	493	51,691	54,100
Foreign currency translation	663	-	-	663
Share-based payments	-	56	-	56
Transfer from accumulated losses	-	-	1,078	1,078
Transfer upon exercise of options	-	(87)	-	(87)
Dividends declared	-	-	(13,978)	(13,978)
Balance at 30 June 2025	<u>2,579</u>	<u>462</u>	<u>38,791</u>	<u>41,832</u>

*Foreign currency reserve*

The reserve is used to recognise exchange differences arising from the translation of the financial statements of foreign operations to Australian dollars.

*Options reserve*

The reserve is used to recognise the value of equity benefits provided to employees under the Employee Share Option Plan.

*General reserve*

The reserve is used to quarantine the Company's standalone accumulated profits generated in a reporting period.

**Note 15. Financial instruments**

The Consolidated Entity's principal financial instruments comprise receivables, payables, cash and cash equivalents.

**Note 15. Financial instruments (continued)**

The main risks arising from the Consolidated Entity's financial instruments are interest rate risk, foreign currency risk, commodity price risk, credit risk and liquidity risk. The Consolidated Entity uses different methods to measure and manage different types of risk to which it is exposed. These include monitoring levels of exposure to interest rate and foreign exchange risk and assessments of market forecasts for interest rates, foreign exchange and commodity prices. These risks are summarised below.

Ultimate responsibility for liquidity risk management rests with the Board of Directors, who have established an appropriate liquidity risk management framework for the management of the Consolidated Entity's short, medium and long-term funding and liquidity management requirements. The Board reviews and agrees management's assessment for managing each of the risks identified below.

**Risk Exposures and Responses**

**(a) Fair value risk**

The Consolidated Entity has trade receivables, other financial assets, trade payables and borrowings, which are a reasonable approximation of their fair values due to their short-term nature. Given the nature of the financial assets and liabilities noted and the relatively short-term nature, there is no material fair value risk.

**(b) Interest rate risk**

The Consolidated Entity's exposure to market interest rates is related primarily to its cash deposits and borrowings.

The Consolidated Entity constantly analyses its interest rate opportunity and exposure. Within this analysis consideration is given to existing positions and alternative arrangement on fixed or variable deposits. The impact of interest rate movement is not material to the Consolidated Entity.

**(c) Foreign exchange risk**

The Consolidated Entity is subject to foreign exchange risk on its international exploration and appraisal activities where costs are incurred in foreign currencies. The Consolidated Entity generates revenue denominated in foreign currencies, and does hold significant foreign currency cash balances. The Consolidated Entity's foreign exchange risk exposures are mitigated through natural hedging, where appropriate.

The Consolidated Entity's exposure to foreign exchange risk at the reporting date was as follows (holdings are shown in AUD equivalent):

<b>Consolidated 30 June 2025</b>	<b>USD \$'000</b>	<b>NZD \$'000</b>	<b>IDR \$'000</b>

Management believes the risk exposures as at the reporting date are representative of the risk exposure inherent in the financial instruments.

**(d) Commodity price risk**

The Consolidated Entity is involved in oil and gas exploration and production and generates revenue from the sale of oil and gas. Exposure to commodity price risk is therefore limited to this revenue and from future revenue potentially generated from successful exploration and development activities. The Consolidated Entity's exposure to commodity price fluctuations is therefore in respect of the sale of petroleum products denominated in US dollars.

Gas contracts are primarily fixed price, with only a low number of contracts subject to spot prices, limiting the Consolidated Entity's exposure to fluctuations in gas price.

Commodity price risks are measured by monitoring and stress testing the Group's forecast financial position to sustained periods of low oil and gas prices. This analysis is regularly performed on the Group's portfolio and, as required, for discrete projects and acquisitions.

**(e) Liquidity risk**

Liquidity risk is the risk that the Consolidated Entity cannot meet or generate sufficient cash resources to meet its payment obligations in full as they fall due, or can only do so at materially disadvantageous terms.

Ultimate responsibility for liquidity risk management rests with the Board of Directors, who have established an appropriate liquidity risk management framework for the management of the Group's short, medium and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

Consequently, there are reasonable grounds to conclude that the Group is able to meet its payment obligations in full as and when they fall due.

Prudent liquidity risk management implies maintaining sufficient cash to meet the Group's obligations. The Group aims to maintain flexibility in funding to meet ongoing operational requirements, exploration and development expenditure, and small-to-medium-sized opportunistic projects and investments, including taking out loans and where available and appropriate, maintaining credit facilities.

**Cue Energy Resources Limited**  
**Notes to the financial statements**  
**30 June 2025**

**Note 15. Financial instruments (continued)**

The following table analyses the contractual maturities of the Group's financial liabilities into relevant groupings based on the remaining period at the reporting date to the contractual undiscounted cash flows comprising principal and interest repayments.

<b>30 June 2025</b>	<b>12 months or less \$'000</b>	<b>1 to 2 years \$'000</b>	<b>2 to 5 years \$'000</b>	<b>More than 5 years \$'000</b>
<b>Non-derivative financial liabilities</b>				
Trade and other payables	5,225	-	-	-
Lease liabilities	76	182	-	-
<b>30 June 2024</b>	<b>12 months or less \$'000</b>	<b>1 to 2 years \$'000</b>	<b>2 to 5 years \$'000</b>	<b>More than 5 years \$'000</b>
<b>Non-derivative financial liabilities</b>				
Trade and other payables	2,986	-	-	-
Lease liabilities	43	174	-	-

**(f) Credit risk**

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Consolidated Entity. The maximum exposure to credit risk at the reporting date to recognised financial assets is the carrying amount, net of any provisions for impairment of those assets, as disclosed in the statement of financial position and notes to the financial statements.

The Consolidated Entity trades only with recognised, creditworthy third parties, and as such collateral is not requested nor is it the Consolidated Entity's policy to securitize its trade and other receivables.

It is the Consolidated Entity's policy that all customers who wish to trade on credit terms are subject to credit verification procedures which could include an assessment of their independent credit rating, financial position, past experience and industry reputation. The risks are regularly monitored.

Generally, trade receivables are written off when there is no reasonable expectation of recovery. Indicators of this include the failure of a debtor to engage in a repayment plan, no active enforcement activity and a failure to make contractual payments for a period greater than 1 year.

**Note 16. Key management personnel disclosures and related party disclosures**

*Directors*

The following persons were directors of Cue Energy Resources Limited during the financial year:

Alastair McGregor (Non-executive Chairman)  
 Andrew Jefferies (Non-Executive Director)  
 Peter Hood AO (Non-Executive Director)  
 Richard Malcolm (Non-Executive Director)  
 Rod Ritchie (Non-Executive Director)  
 Samuel Kellner (Non-Executive Director)  
 Marco Argentieri (Non-Executive Director)

**Directors' Fee Details**

**\$**

Total directors' fees for the year ended 30 Jun 2025	598,595
Invoiced - Paid in relation to FY 2025	598,595
Amount invoiced but not paid	-

**Note 16. Key management personnel disclosures and related party disclosures (continued)**

*Key management personnel*

The following person also had the authority and responsibility for planning, directing and controlling the major activities of the Consolidated Entity, directly or indirectly, during the financial year:

Matthew Boyall (Chief Executive Officer)

Total remuneration payments and equity issued to Directors and key management personnel are summarised below:

	<b>Consolidated</b>	
	<b>30 June 2025</b>	<b>30 June 2024</b>
Short term employment benefits (including non-monetary benefits)	1,032,475	941,899
Cash bonuses	101,562	87,051
Long term benefits	(676)	(951)
Post-employment benefits	37,894	38,845
Share-based payments	61,747	54,243
Total employee benefits	<u>1,233,002</u>	<u>1,121,087</u>

**Other related party transactions**

Repayment of amounts owing to the Company as at 30 June 2025 and all future debts due to the Company, by the controlled entities are subordinated in favour of all other creditors. The Company has agreed to provide sufficient financial assistance to the controlled entities as and when it is needed to enable the controlled entities to continue operations.

The Company provides management, administration and accounting services to the subsidiaries. No management fees were charged to subsidiaries in the FY 2025 or FY 2024.

The Consolidated Entity's immediate parent company is Echelon Resources Limited (Echelon), a company incorporated in New Zealand. During the financial year, Echelon provided a range of services to the Consolidated Entity under consulting agreements. The arrangements are on normal commercial terms.

	<b>Consolidated</b>	
	<b>30 June 2025</b>	<b>30 June 2024</b>
	<b>\$'000</b>	<b>\$'000</b>
<i>Transaction with other related parties:</i>		
Consulting services received from immediate parent company and directors	549	479
Services provided by entities controlled by KMP*	49	-

The Consolidated Entity enters into operating arrangements where the Group has joint control over the respective venture's oil and gas net assets, described in note 21. In each of the joint operations, the participants appoint an operator to act on their behalf in managing operations (the Operator).

\*During the year, \$ 0.049 million was paid to Rod Ritchie for health and safety advisory services provided.

All financial relationships with the Operator are on an arm's length basis.

**Cue Energy Resources Limited**  
**Notes to the financial statements**  
**30 June 2025**

**Note 17. Auditor remuneration**

During the financial year the following fees were paid or payable for services provided by the auditor of the company:

	<b>Consolidated</b> <b>30 June 2025</b>	<b>Consolidated</b> <b>30 June 2024</b>
	\$	\$
<i>Audit services - KPMG</i>		
Audit or review of the financial statements	439,906	412,770
Other assurance services	24,498	23,973
	<u>464,404</u>	<u>436,743</u>
<i>Other services - KPMG</i>		
Advisory services	20,900	40,992
Tax compliance	27,681	32,887
	<u>48,581</u>	<u>73,879</u>
	<u>512,985</u>	<u>510,622</u>

No other services were provided by the auditor during the year, other than those set out above.

**Note 18. Contingencies and commitments**

*Contingent assets and liabilities*

The Directors are not aware of any contingent assets or contingent liabilities as at 30 June 2025 (30 June 2024: Nil).

*Expenditure commitments*

	<b>Consolidated</b> <b>30 June 2025</b>	<b>Consolidated</b> <b>30 June 2024</b>
	\$'000	\$'000
<i>Exploration development expenditure commitments*</i>		
The Consolidated Entity participates in a number of licences, permits and production sharing contracts for which it has made commitments.		
Within one year*	4,105	8,339
One to five years	1,076	9,759
	<u>5,181</u>	<u>18,098</u>

\* The majority of the commitments are in relation to drilling and infrastructure works at the Mahato PSC.

Commitments reflect the Consolidated Entity's interest in future financial obligations, based on existing facts and circumstances, where the Consolidated Entity is contractually or substantively committed to making future expenditure. These commitments may be either direct obligations or, as is the case with most commitments, obligations which the respective projects' operators enter into on the Consolidated Entity's behalf with suppliers and service providers.

**Note 19. Parent entity information**

Cue Energy Resources Limited is the parent entity.

**Note 19. Parent entity information (continued)**

Set out below is the supplementary information about the parent entity.

*Consolidated Statement of profit or loss and other comprehensive income*

**Accounting policy for joint operations**

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. The consolidated entity has recognised its share of jointly held assets, liabilities, revenues and expenses of joint operations. These have been incorporated in the financial statements under the appropriate classifications.

**Note 22. Events after the reporting period**

No matter or circumstance has arisen since 30 June 2025 that has significantly affected, or may significantly affect the Consolidated Entity's operations, the results of those operations, or the Consolidated Entity's state of affairs in future financial years.

**Note 23. Reconciliation of profit after income tax to net cash from operating activities**

	<b>Consolidated</b>	
	<b>30 June 2025</b>	<b>30 June 2024</b>

	<b>\$'000</b>	<b>\$'000</b>
Profit after income tax	<u>6,316</u>	<u>14,189</u>
	<b>Number</b>	<b>Number</b>
Weighted average number of ordinary shares used in calculating basic and diluted earnings per share	<u>698,758,220</u>	<u>698,194,450</u>
	<b>Cents</b>	<b>Cents</b>
Basic earnings per share	0.90	2.03
Diluted earnings per share	0.90	2.03

*Accounting policy for earnings per share*

*Basic earnings per share*

Basic earnings per share is calculated by dividing the earnings attributable to the owners of Cue Energy Resources Limited, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

*Diluted earnings per share*

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

**Note 25. Share-based payments**

During the year ended FY 2025, \$0.14 million in share-based payments expenses was recognised (FY 2024: \$0.11 million).

On 1 July 2024, 1,370,359 options over the Company's fully paid ordinary shares expired, with an exercise price of \$0.09 (9 cents) per fully paid ordinary share.

On 15 October 2024, the Company issued 3,411,549 options over fully paid ordinary shares to employees with an exercise price of \$0.12 (12 cents) per fully paid ordinary share and which expire on 1 July 2029. The options were valued using Black-Scholes option pricing model. \$0.05 million of share-based payment expense was recognised in relation to the options for the year ended 30 June 2025.

During FY 2025 and up to the date of this report, 2,647,549 options with an expiry date of 22 July 2026 and an exercise price of \$0.078 (7.8 cents) per fully paid ordinary share were exercised on a cashless basis, as a result of which 720,342 fully paid ordinary shares in the Company were issued.

On 1 July 2025, 3,204,237 options over the Company's fully paid ordinary shares expired, with an exercise price of \$0.117 (11.7 cents) per fully paid ordinary share.

Set out below are summaries of options granted under the plan:

**30 June 2025**

Grant date	Expiry date	Exercise price	Balance at the start of the year	Granted	Exercised	Expired/forfeited/other	Balance at the end of the year
04/10/2019	01/07/2024	\$0.090	1,370,361	-	-	(1,370,361)	-
16/07/2020	01/07/2025	\$0.117	3,204,237	-	-	-	3,204,237
23/07/2021	22/07/2026	\$0.078	4,005,799	-	(2,647,549)	-	1,358,250

08/09/2023	01/07/2028	\$0.072	-	4,640,759	-	-	4,640,759
			17,805,402	4,640,759	(2,152,654)	(3,473,653)	16,819,854

Weighted average exercise price \$0.088 \$0.072 \$0.090 \$0.070 \$0.087

**Note 25. Share-based payments (continued)**

For the options granted during the current financial year, the valuation model inputs used to determine the fair value at the grant date, are as follows:

<b>Grant date</b>	<b>Expiry date</b>	<b>Share price at grant date</b>	<b>Exercise price</b>	<b>Expected volatility</b>	<b>Risk-free interest rate</b>	<b>Fair value at grant date</b>
15/10/2024	01/07/2029	\$0.990	\$0.120	64.80%	3.88%	\$0.051

*Accounting policy for share-based payments*

Equity-settled share-based compensation benefits are provided to employees.

Equity-settled transactions are awards of shares, or options over shares, that are provided to employees in exchange for the rendering of services. Cash-settled transactions are awards of cash for the exchange of services, where the amount of cash is determined by reference to the share price.

The cost of equity-settled transactions are measured at fair value on grant date. Fair value is independently determined using either the Binomial or Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option, together with non-vesting conditions that do not determine whether the Consolidated Entity receives the services that entitle the employees to receive payment. No account is taken of any other vesting conditions.

The cost of equity-settled transactions are recognised as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognised in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognised in previous periods.

If equity-settled awards are modified, as a minimum an expense is recognised as if the modification has not been made. An additional expense is recognised, over the remaining vesting period, for any modification that increases the total fair value of the share-based compensation benefit as at the date of modification.

If the non-vesting condition is within the control of the Consolidated Entity or employee, the failure to satisfy the condition is treated as a cancellation. If the condition is not within the control of the Consolidated Entity or employee and is not satisfied during the vesting period, any remaining expense for the award is recognised over the remaining vesting period, unless the award is forfeited.

If equity-settled awards are cancelled, it is treated as if it has vested on the date of cancellation, and any remaining expense is recognised immediately. If a new replacement award is substituted for the cancelled award, the cancelled and new award is treated as if they were a modification.

\* Shares held by Cue Mahakam Hilir Pty Ltd.

\*\* This entity is part of a tax-consolidated group under Australian taxation law, for which Cue Energy Resources Limited is the head entity.

**Key assumptions and judgements**

**Determination of Tax Residence**

Section 295 (3A) of the Corporation Acts 2001 requires that the tax residency of each entity which is included in the Consolidated Entity Disclosure Statement (CEDS) be disclosed. In the context of an entity which was an Australian resident, "Australian resident" has the meaning provided in the Income Tax Assessment Act 1997.

In determining tax residency, the consolidated entity has applied the following interpretations:

**Australian tax residency**

The consolidated entity has applied current legislation and judicial precedent, including having regard to the Commissioner of Taxation's public guidance in Tax Ruling TR 2018/5.

**Foreign tax residency**

The consolidated entity has applied current legislation and where available judicial precedent in the determination of foreign tax residency.

**Cue Energy Resources Limited**  
**Directors' declaration**  
**30 June 2025**

In the directors' opinion:

- the attached financial statements and notes comply with the Corporations Act 2001, the Australian Accounting Standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements;
- the attached financial statements and notes comply with International Financial Reporting Standards as issued by the International Accounting Standards Board as described in note 2 to the financial statements;
- the attached financial statements and notes give a true and fair view of the Consolidated Entity's financial position as at 30 June 2025 and of its performance for the financial year ended on that date;
- the consolidated entity disclosure statement as at 30 June 2025 is true and correct; and
- there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable; and

The directors have been given the declarations required by section 295A of the Corporations Act 2001.

Signed in accordance with a resolution of directors made pursuant to section 295(5)(a) of the Corporations Act 2001.

On behalf of the directors

---

Alastair McGregor  
Non-Executive Chairman

# Independent Auditor's Report

To the shareholders of Cue Energy Resources Limited

## Report on the audit of the Financial Report

### Opinion

We have audited the **Financial Report** of Cue Energy Resources (the Company).

In our opinion, the accompanying Financial Report of the Company gives a true and fair view, including of the **Group's** financial position as at 30 June 2025 and of its financial performance for the year then ended, in accordance with the *Corporations Act 2001*, in compliance with *Australian Accounting Standards* and the *Corporations Regulations 2001*.

The **Financial Report** comprises:

- Consolidated statement of financial position as at 30 June 2025
- Consolidated statement of profit or loss and other comprehensive income, Consolidated statement of changes in equity, and Consolidated statement of cash flows for the year then ended
- Consolidated entity disclosure statement and accompanying basis of preparation as at 30 June 2025
- Notes, including material accounting policies information
- Directors' Declaration.

The **Group** consists of the Company and the entities it controlled at the year end or from time to time during the financial year.

### Basis for opinion

We conducted our audit in accordance with *Australian Auditing Standards*. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report.

We are independent of the Group in accordance with the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the Financial Report in Australia. We have fulfilled our other ethical responsibilities in accordance with these requirements.

## Key Audit Matters

Key Audit Matters are those matters that, in our professional judgement, were of most significance in our audit of the Financial Report of the current period.

This matter was addressed in the context of our audit of the Financial Report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter.

Restoration provision relating to the Maari field included within non-current provisions	
Refer to Note 12 to the Financial Report	
The key audit matter	How the matter was addressed in our audit
<p>We identified the restoration provision for the Maari field as a key audit matter due to:</p> <ul style="list-style-type: none"> <li>the estimation uncertainty relating to the forecast restoration cash flows, which require auditor judgement to evaluate their appropriateness; and</li> <li>the significant size of the Maari restoration provision relative to the Group's total restoration provisions.</li> </ul> <p>The Group incurs obligations to close, restore and rehabilitate its sites and associated facilities. We focused on the following key inputs utilised by the Group in determining the restoration provision for the Maari field:</p> <ul style="list-style-type: none"> <li>useful life of the field and related assets, giving consideration to the economic reserves and production profiles;</li> <li>the interpretation of legislative and regulatory requirements governing the Group's obligations;</li> <li>the cost and timing of future rehabilitation costs; and</li> <li>discount, forecast inflation and fx rates applied by the Group to determine the net present value of forecast restoration cash flows.</li> </ul>	<p>Our procedures included:</p> <ul style="list-style-type: none"> <li>assessed the consistency of timing between planned restoration activities and the Group's reserves estimates and expected production profile;</li> <li>evaluated the competency of the Group's competent person responsible for the estimation of economic reserves in accordance with industry standards;</li> <li>used our knowledge of the Group, our industry experience and understanding of the applicable regulatory requirements to challenge whether the estimated restoration costs and their associated timing are reasonable;</li> <li>evaluated discount, forecast inflation and fx rates applied by the Group to determine the net present value of the restoration provision against publicly available data, including risk free rates;</li> <li>assessed the integrity of the provision calculation, including the accuracy of the underlying calculation formulas;</li> <li>assessed the appropriateness of the Group's disclosures in the financial report, using our understanding obtained from our testing and against accounting standard requirements.</li> </ul>

## Other Information

Other Information is financial and non-financial information in Cue Energy Resources Limited's annual report which is provided in addition to the Financial Report and the Auditor's Report. The Directors are responsible for the Other Information.

The Other Information we obtained prior to the date of this Auditor's Report was the Financial and Operations Review, Directors' Report and the Shareholder Information. The Chairman's Overview, Reserves and Resources, Sustainability report and Taskforce on Climate-Related Financial Disclosures (TCFD) Statement are expected to be made available to us after the date of the Auditor's Report.

Our opinion on the Financial Report does not cover the Other Information and, accordingly, we do not express an audit opinion or any form of assurance conclusion thereon, with the exception of the Remuneration Report and our related assurance opinion.

In connection with our audit of the Financial Report, our responsibility is to read the Other Information. In doing so, we consider whether the Other Information is materially inconsistent with the Financial Report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We are required to report if we conclude that there is a material misstatement of this Other Information, and based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report we have nothing to report.

## Responsibilities of the Directors for the Financial Report

The Directors are responsible for:

- preparing the Financial Report in accordance with the *Corporations Act 2001*, including giving a true and fair view of the financial position and performance of the Group, and in compliance with *Australian Accounting Standards* and the *Corporations Regulations 2001*
- implementing necessary internal control to enable the preparation of a Financial Report in accordance with the *Corporations Act 2001*, including giving a true and fair view of the financial position and performance of the Group, and that is free from material misstatement, whether due to fraud or error
- assessing the Group and Company's ability to continue as a going concern and whether the use of the going concern basis of accounting is appropriate. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate the Group and Company or to cease operations, or have no realistic alternative but to do so.

## Auditor's responsibilities for the audit of the Financial Report

Our objective is:

- to obtain reasonable assurance about whether the Financial Report as a whole is free from material misstatement, whether due to fraud or error; and
- to issue an Auditor's Report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with *Australian Auditing Standards* will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on

the basis of the Financial Report.

A further description of our responsibilities for the audit of the Financial Report is located at the *Auditing and Assurance Standards Board* website at: [https://www.auasb.gov.au/media/bwvjcgre/ar1\\_2024.pdf](https://www.auasb.gov.au/media/bwvjcgre/ar1_2024.pdf). This description forms part of our Auditor's Report.

## Report on the Remuneration Report

### Opinion

In our opinion, the Remuneration Report of Cue Energy Resources Limited for the year ended 30 June 2025 complies with *Section 300A* of the *Corporations Act 2001*.

### Directors' responsibilities

The Directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with *Section 300A* of the *Corporations Act 2001*.

### Our responsibilities

We have audited the Remuneration Report included in pages 30 to 36 of the Directors' report for the year ended 30 June 2025.

Our responsibility is to express an opinion as to whether the Remuneration Report complies in all material respects with *Section 300A* of the *Corporations Act 2001*, based on our audit conducted in accordance with *Australian Auditing Standards*.
