RE **Quarterly Report for Period Ended 31 December 2009** 

Attached please find Cue Energy Resources Limited's release with respect to the above mentioned.

Yours faithfully

Andrew M Knox **Public Officer** 

# QUARTERLY REPORT FOR THE QUARTER ENDING 31 DECEMBER 2009

#### **SUMMARY**

#### **Financial and Corporate**

#### - Quarterly revenue

A\$12.1 million on sales of 153,281 barrels of oil and 160 million cubic feet of gas. Revenue in line with last quarter.

#### - Cash at end of quarter

A\$18.1 million.

### **Operations**

#### **PNG**

#### Barikewa Gas Field

- Acquisition of the 60km 2D seismic survey over the Barikewa gas field was successfully completed.

#### • SE Gobe Field

- Negotiations are in progress to sell SE Gobe gas to the PNG LNG project

#### **New Zealand**

#### Maari field

- Over 5.5 million barrels of oil produced since February 2009.
- Successful appraisal wells completed for future production from the Maari
   M2A zone and the Manaia structure.
- Maari development drilling program completed.
- Preparation for installation of permanent workover rig largely completed.

## • Exploration

Exploration activity has been enhanced with Cue farmins for 20% interests in permits PEP51313 and PEP51149 in the Taranaki Basin, during the quarter.

#### Indonesia

#### Oyong Field

Gas production began from the Oyong field at the beginning of October 2009.

#### Wortel Field

The Wortel gas field plan of development was approved by the Indonesian authorities.

#### Australia

#### **Carnarvon Basin**

#### MEO committed to drill the Artemis -1 well in WA-360-P

In December 2009, MEO irrevocably committed to drilling the Artemis -1 well in WA-360-P. Cue will have a 15% free carry through the well.
 MEO also announced that a major international company would farm into its interest in the permit.

#### Strong industry interest in the Caterina prospect in WA-389-P

Several major companies are reviewing data over the Caterina prospect in Cue's 100% interest WA-389-P permit. The Caterina prospect has the potential to contain as much as 11 trillion cubic feet of natural gas in place in stacked sands.

Cue expects to finalize a farmout in first quarter 2010.

1. PRODUCTION / DEVELOPMENT ACTIVITY

PAPUA NEW GUINEA

PDL 3 – SE Gobe Field, PNG (5.568892% interest)

**Operator: Santos** 

SE Gobe Unit, PNG (3.285646% interest)

**Operator: Oil Search** 

At the end of the quarter, the SE Gobe field oil production rate for the calendar year 2009 averaged approximately 4,500 barrels of oil per day (Cue share

approximately 150 barrels oil per day).

Cue's oil production revenue received during the quarter from the field was

A\$0.92 million and equated to 11,179 barrels of oil.

Cue did not have any hedging arrangements in place during the quarter.

Negotiations are in progress to sell SE Gobe gas to the PNG LNG project.

**INDONESIA** 

Sampang PSC – Oyong Field – Madura Strait, East Java, Indonesia (15%

interest)

**Operator: Santos** 

**Oyong Field** 

Cue's oil production revenue received during the quarter from the field was A\$3.4

million and equated to 42,485 barrels of oil.

The average oil production rate for the quarter was 3,800 barrels of oil per day.

Gas production from the field began on 1 October 2009. Cue's gas production

revenue received during the quarter from the field was A\$0.47 million and

equated to 160 million cubic feet of sales gas.

Cue did not have any hedging arrangements in place during the quarter.

#### **Wortel Field**

A plan of development for the Wortel field was approved by BP MIGAS during the quarter. The development will consist of a well head platform, two gas development wells and a seven kilometre pipeline to the Oyong facilities. Wortel is estimated to contain gross gas reserves of 1P 66 BCF, 2P 103 BCF, 3P 121 BCF. Cue will book these as at YE 2009. Front end engineering and design (FEED) studies are expected to begin in the first quarter 2010 and first gas is now expected in the second half of 2011.

#### NEW ZEALAND

PMP 38160 (Granted from December 2005, for 22 years) Taranaki Basin – New Zealand (5% interest)

**Operator: OMV New Zealand** 

Oil production revenue received during the quarter was A\$7.3 million and equated to 99,617 barrels.

The development drilling program was finished with the M2A and Manaia appraisal wells completed for future production.

The Maari M2A oil development well was successfully drilled during September 2009. The M2A sandstone lies approximately 50 metres above the main Moki reservoir. The M2A well drilled 1209 metres of horizontal section through the reservoir with net oil pay of 660 metres in excellent quality rock. It is expected that the well will begin producing oil at the end of January 2010 following the field shut down.

The in place oil volume is estimated by the operator to be approximately 30-40 million barrels. Recoverable volumes will be estimated in due course.

The Manaia-1 well, which was successfully drilled from the Maari platform to a measured depth of 7945 metres with a 1524 metre horizontal penetration of the target Mangahewa sandstone reservoir section, will be completed using the workover rig and will begin oil production in first quarter 2010.

The in place oil volume is estimated by the operator to be around 58 million barrels of oil. Reserve volumes will be estimated later based on production performance.

A remedial workover of the MR1 production well was undertaken during the quarter and the MR3 and MR5 production wells were shut in later in the quarter

for remedial mechanical work.

Producing wells were also shut in from time to time during heavy lift operations and during the demobilization of the ENSCO 107 jack up drilling rig following

completion of the development drilling.

Preparations continued for the installation of a permanent workover rig on the

Maari platform. Installation of the rig is expected during a planned 10 day field

shut down in mid January 2010. The field shut down is required to allow

statutory inspection of production facilities.

2. EXPLORATION AND APPRAISAL ACTIVITIES

PAPUA NEW GUINEA

PRL -9 – Papuan Basin, PNG (14.894% interest)

**Operator: Santos** 

Acquisition of the 60 km Barikewa 2D seismic survey was completed during the

quarter. The data will be used to locate the Barikewa -3 appraisal well which is

expected to be drilled in early 2011.

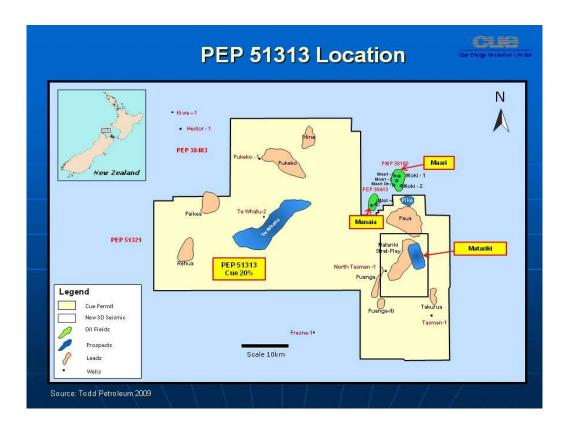

**INDONESIA** 

Sampang PSC

General exploration studies continued during the quarter.

Page 5 of 10

#### NEW ZEALAND

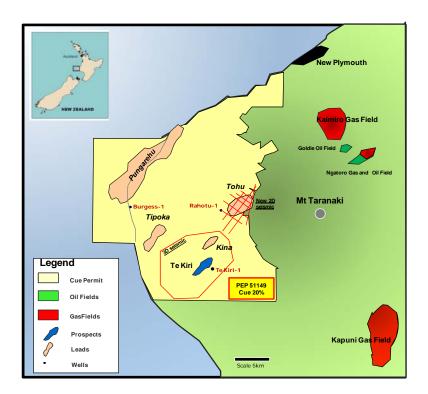

**PEP51313 – (20% interest)** 

**Operator: Todd Exploration Limited** 

During the quarter, Cue obtained a 20% interest from Todd Exploration in offshore permit PEP51313 which lies immediately adjacent to the Maari and Manaia oil fields in the offshore Taranaki Basin.

The permit contains a number of high potential prospects. Preparations have been made to acquire a 200 square kilometre 3D seismic survey over the Matariki prospect which has the potential to contain 100 million barrels of recoverable oil in a most likely case. The survey is expected to begin in the second quarter 2010.

**PEP51149 – (20% interest)** 

**Operator: Todd Exploration Limited** 

During the quarter, Cue obtained a 20% interest from Todd Energy in permit PEP51149. The permit is largely onshore in the Taranaki Basin south of New Plymouth.

The permit contains several prospects that have the potential to contain significant commercial volumes of natural gas.

Interpretation of existing 2D and 3D seismic data continued during the quarter.

**AUSTRALIA** 

WA-359-P Carnaryon Basin – Western Australia (20% interest)

**Operator: MEO Australia Limited** 

MEO has given notice that it is not prepared to commit to drilling a well in the

permit at its sole cost and will reassign its interest back to Cue. Cue will resume

operatorship and have a 50% interest.

WA-360-P Carnarvon Basin – Western Australia (20% interest: MEO + 5%

option)

**Operator: MEO Australia Limited** 

MEO has irrevocably committed to drill the large Artemis gas prospect and

expects to begin drilling in the second half of 2010. MEO estimates that the

Artemis prospect has the potential to contain 12 trillion cubic feet of recoverable

natural gas within the permit.

Cue will have a free carried 15% interest in the Artemis well and any consequent

discovery; and ongoing 15% interest in the permit.

WA-389-P Carnarvon Basin – Western Australia (100% interest)

**Operator: Cue Energy Resources Limited** 

During the quarter, Cue began a farmout campaign for its 100% interest in permit

WA-389-P. There has been considerable industry interest in the permit and to

date ten major companies are evaluating the technical data over the very large

Caterina gas prospect.

Caterina is a large tilted fault block trap beneath the current seafloor shelf break.

Direct hydrocarbon indicators (seismic amplitude, etc) are interpreted in several

of the objectives. A single 35 metre sand in the structure in a mid case could

contain approximately 4 trillion cubic feet of recoverable natural gas.

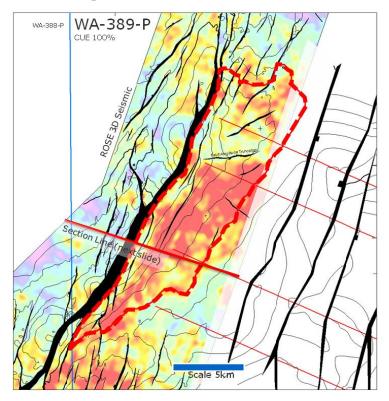

reservoir sands could contain up to 11 trillion cubic feet of gas in place in a mid

case.

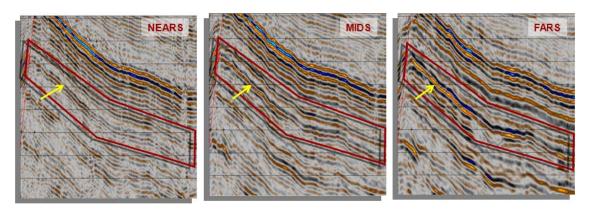

Cue expects to finalise a farmout around the end of the first quarter 2010.

Page 8 of 10

## **Caterina Prospect**

Structure map on Mungaroo Formation objective over Caterina prospect showing seismic amplitude in red.

Seismic line showing increased amplitude with trace offset at Mungaroo Formation objective, which could indicate the presence of gas.

By Order of the Board

Andrew Knox Public Officer

Andrew Krok

Various statements in this report constitute statements relating to intentions, future acts and events. Such statements are generally classified as forward looking statements and involve know risks expectations, uncertainties and other important factors that could cause those future acts, events and circumstances to differ from the way or manner in which they are expressly or impliedly portrayed herein.

Some of the more important of these risks, expectations and uncertainties are pricing and production levels from the properties in which the Company has interests and the extent of the recoverable reserves at those properties. In addition, the Company has a large number of exploration permits. Exploration for oil and gas is expensive, speculative and subject to a wide range of risks. Individual investors should consider these matters in light of their personal circumstances (including financial and taxation affairs) and seek professional advice from their accountant, lawyer or other professional adviser as to the suitability for them of an investment in the Company.

*Rule 5.3*

## **Notes**

- The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- The definitions in, and provisions of, AASB 1022: Accounting for Extractive Industries and AASB 1026: Statement of Cash Flows apply to this report.
- Accounting Standards ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
